Davenport, Wilson Prichard, 2022-03-14 Recent decades have seen important progress in strengthening country tax systems

Yet many areas of reform have remained stubbornly resistant to major improvements Overall revenue collection still falls short of that needed for effective governance and service delivery Tax collection is too often riddled with high rates of evasion among large corporations and the rich and by disproportionate though often hidden burdens on lower income groups As countries around the world deal with the large debt burdens induced by COVID 19 an in depth look at how to strengthen tax systems is especially timely Innovations in Tax Compliance Building Trust Navigating Politics and Tailoring Reform takes a fresh look at tax reform The authors draw on recent research and experience for their new conceptual framework to guide more effective approaches to reform Building on the achievements of recent decades they argue for a greater emphasis on the overlapping goals of building trust navigating political resistance and tailoring reform to unique local contexts an emphasis achieved by identifying the most binding constraints on reform This focus not only can lead to greater compliance a fairer system and higher revenues but also can contribute to building state capacity sustained political support for further reforms and a stronger fiscal contract between citizens and governments

Kirchler assembles research on tax compliance with a focus on tax evasion and integrates the findings into a model based on the interaction climate between tax authorities and taxpayers The interaction climate is defined by citizens trust in authorities and the power of authorities to control taxpayers effectively depending on trust and power either voluntary compliance enforced compliance or no compliance are likely outcomes Featuring chapters on the social representations of taxation decision making and self employed income tax behaviour this book will appeal to researchers in economic psychology behavioural economics and public administration      **Public Economics** M Govinda Rao,Mihir Rakshit,2011-01-06 Amaresh Bagchi Indian economist contributed articles      Taxation and Development Mr.Michael Keen,2012-09-01 Issues of taxation and development which have long been a central concern of the IMF have attracted wider and renewed interest in the last few years This paper reflects on three broad lessons of experience that developing countries differ vastly in tax matters and in ways that are less than fully understood that the history of big ideas in guiding tax reform for developing countries is decidedly mixed and that the value of the emphasis often placed in this context on informality is decidedly limited It also asks whether ideas of state building emphasized in some of the recent literature are likely to lead to practical advice much different from that commonly offered now      **Corporate and Financial Intergenerational Leadership** Julia Margarete Puaschunder,2019-12-03 Intergenerational predicaments of climate change over indebtedness and demographic aging of the Western world population put pressure on future generations As such this book explores how corporate and financial social responsibility can leverage intergenerational harmony The concept of responsibility is shown to underlie the international emergence of Corporate Social Responsibility CSR while the book also describes the rise of Socially Responsible Investment SRI in the international arena and the intrinsic socio psychological motives of socially responsible investors As shown here in this age of climate change over indebtedness and demographic aging future corporate and financial intergenerational leadership may continue to embrace social responsibility in order to ensure a sustainable future for humankind      **The Institutions Curse** Victor Menaldo,2016-08-16 The resource curse is the view that countries with extensive natural resources tend to suffer from a host of undesirable outcomes including the weakening of state capacity authoritarianism fewer public goods war and economic stagnation This book debunks this view arguing that there is an institutions curse rather than a resource curse Legacies endemic to the developing world have impelled many countries to develop natural resources as a default sector in lieu of cultivating modern and diversified economies and bad institutions have also condemned nations to suffer from ills unduly attributed to minerals and oil Victor Menaldo also argues that natural resources can actually play an integral role in stimulating state capacity capitalism industrialization and democracy even if resources are themselves often a symptom of underdevelopment Despite being cursed by their institutions weak states are blessed by their resources greater oil means more development both historically and across countries today
