Anthropological Perspectives on Children as Helpers, Workers, Artisans, and Laborers David F. Lancy, 2017-12-12 The study of childhood in academia has been dominated by a mono cultural or WEIRD Western educated industrialized rich and democratic perspective Within the field of anthropology however a contrasting and more varied view is emerging While the phenomenon of children as workers is ephemeral in WEIRD society and in the literature on child development there is ample cross cultural and historical evidence of children making vital contributions to the family economy Children s labor is of great interest to researchers but widely treated as extra cultural an aberration that must be controlled Work as a central component in children s lives development and identity goes unappreciated Anthropological Perspectives on Children as Helpers Workers Artisans and Laborers aims to rectify that omission by surveying and synthesizing a robust corpus of material with particular emphasis on two prominent themes the processes involved in learning to work and the interaction between ontogeny and children s roles as workers
