impediments to realizing this vision is the deleterious effect of traditional systems of teacher evaluation. Rather than infantilizing teachers we need to empower them. Traditional forms of teacher evaluation have failed. They are riddled with negative expectations about teachers and what motivates them. Taken together these underlying assumptions form a pernicious cloud of counterproductive expectations that many teachers will live down to. Inadvertently the traditional system of teacher evaluation has created a vicious cycle of self-sealing logic. It is now time for teachers to reclaim their profession, the process of which involves a relentless focus on adult learning, professional learning that is self-directed. The more dynamic and stimulating the culture of adult learning, the more dynamic and stimulating student learning will be.
