Teacher Distribution in Developing Countries Thomas F. Luschei, Amita Chudgar, 2016-11-08. This book draws on case studies from India, Mexico and Tanzania to examine the complex processes that lead to the educational marginalization of children through differential access to teacher quality. Growing evidence indicates that access to good teachers can boost the academic success of disadvantaged children and narrow achievement gaps between more and less privileged students. Yet in many countries, stronger teachers are concentrated in the classrooms of more advantaged children. Using a teacher labor markets framework, the authors explore the actions of those who employ teachers, the demand side, and teachers themselves, the supply side. Examining key junctures in the teacher career pipeline from recruitment and training to retention and transfer, the authors find that the actions of the demand side often clash with teachers' preferences to live and work in satisfactory environments or to be close to home and family. Too often, the misalignment of the demand and supply sides places marginalized children at a profound educational disadvantage.

Sharpes, 2020-09-10 The preparation of suitably qualified teachers is vital for political social and economic growth in developing countries Some major problems have been caused by the enormous growth in primary enrolment and by the need to train more teachers without reducing standards exacerbated by the fact that in many cases the structure of teacher education is still in its formative stages However these problems can lead to innovative options and solutions Originally published in 1988 this book reports on research and practice in teacher education around the world It examines for example what happens to teacher education at times of great social change or political unrest as in South Africa or Cyprus how programmes in for example Nigeria or China approach minority education and how teachers are prepared for the teaching of indigenous populations such as the Saskatchewan Indians in Canada These examples of international teacher education practice are presented within a specific national regional and cultural context and provide important perspectives on the traditional views of how teachers are and should be prepared and professionally maintained The book will be of interest to all involved in teacher education adult education and curriculum design as well as to students of development studies
