S. Morin, Christophe Maïano, Danielle Tracey, Rhonda G. Craven, 2017-03-01 Increasing numbers of children and adolescents internationally are being diagnosed with secondary health problems e g overweight obesity diabetes asthma anxiety etc due in part or at least related to a lack of physical activity Children and adolescents with various forms of special needs for example children and adolescents with physical or intellectual disabilities children and adolescents from disadvantaged social backgrounds and children and adolescents with chronic illnesses seem to be particularly at risk for secondary health problems which in the end limit their social participation and inclusion as well as their ability to achieve their full potential and to lead happy and fulfilling lives For these children and adolescents involvement in regular physical activities including fitness activities and sports may have far reaching benefits For instance organized physical activities are known to represent an effective vehicle for interventions for children and adolescents with special needs who do not seem to benefit as much as others from more traditional verbal oriented approaches Organized physical activities in or out of school further provide these children and adolescents with opportunities to interact in a positive manner with prosocial peers and adults who may serve as positive role models for them There is currently a paucity of research about physical activities that

effectively include children and adolescents with a range of special needs or research that identifies evidence based strategies that seed success in maximizing the involvement in and the positive biopsychosocial outcomes associated with the practice of physical activity This dearth of research is impeding progress in addressing the biopsychosocial disadvantage that these children and adolescents encounter the development of new solutions for enabling full potential and ensuring that children and adolescents with special needs not only succeed but also flourish in life This volume includes examples of theory research policy and practice that will advance our understanding of how best to encourage these children and adolescents to participate regularly in physical activity how to maximize the biopsychosocial benefits of involvement in physical activities and how to ensure that these physical activities are inclusive for children and adolescents with special needs The focus will be placed on research derived physical activity practices that seed success for children and adolescents with special needs and new directions in theory research and practice that have implications for enhancing physical activity practices with at risk children and adolescents The themes covered in this volume include Strategies to maximise participation of children and adolescents with special needs in physical activity as a global priority Strategies to maximise the social inclusion of children and adolescents with special needs in general physical activities Effective physical education strategies to enhance biopsychosocial outcomes for children and adolescents with special needs Advancing the practice of educators and coaches to cultivate the social inclusion and participation in physical activity of children and adolescents with special needs and Challenging the meaning and implementation of inclusive practices in physical education globally

and Inclusion offers a wealth of knowledge for teaching today's diverse student population including those with disabilities. The book emphasizes the importance of being culturally responsive and acquiring the necessary knowledge to infuse appropriate socially just practices into educational settings. Future teachers will learn how to apply culturally responsive instructional methods and behavior management strategies and will understand broader social and economic contexts for their students' behavior. At the same time, this book provides more than a how-to approach to teaching adapted physical education. Its content and features promote reflective learning, encouraging readers to anticipate the types of teaching situations and challenges that may arise and think through how they will respond. Scenarios and vignettes throughout provide context for the material and promote critical thinking and problem solving.

Case Studies in Adapted Physical Education Samuel Hodge, Nathan Murata, Martin Block, Lauren Lieberman, 2017-07-05 The case studies in this book provide readers with opportunities to think critically about real-life situations that arise when working with children with varied abilities and disabilities, as well as opportunities to question and explore and to empower themselves in the process. The case scenarios illustrate actual experiences faced by a diverse group of general and adapted physical educators representing various contexts from self-contained APE classes and inclusive GPE elementary, middle, and high school, urban, rural, and suburban to youth sports, community recreation, and health club settings. When reading the book, pre-service and in-service teachers will be exposed to the issues facing physical educators as changes in federal law further mandate the inclusion of students with disabilities in general physical education classes and after-school sports. Identifying with the situations and characters in the cases will encourage readers to explore such issues as diversity and disability, attitude and ethics, behavior management, and conflict resolution and inclusion strategies. Questions following each case prompt readers to identify the critical issues and how the physical education professionals dealt with those issues and then determine whether they would have handled the issues in the same way. Analyzing and discussing the cases will enable readers to formulate strategies for dealing with related issues and better prepare them to provide safe, satisfying, and successful physical activity experiences to individuals with varied abilities.
