of Philosophical Perspective on Cinema is simple Can a visual medium such as cinema put in greater perspective diverse aspects of human experience Films are usually sorted by genres but by applying metaphysical existential categories to cinema the author enables readers to reflect on the nature and essence of existence by making life appear less transparent to itself Undoubtedly the connection between sensual reality and philosophical reflection is often glossed over when the emphasis is placed on theoretical abstractions and not life itself While this work is a reflection on the philosophy of existence the author embraces a practical approach to the metaphysical existential foundation of human existence *Polish Cinema in a Transnational Context* Ewa Mazierska,Michael Goddard,2014 This volume introduces a novel treatment of Polish cinema by discussing its international reception performance co productions and subversive migr auteurs such as Andrzej Zulawski and Walerian Borowczyk The opening up of Poland economically and politically to global influences after the fall of the Berlin Wall in 1989 coupled with the rise of transnational approaches to the study of film presents ideal conditions for examining Polish cinema from a transnational vantage point Yet not only have studies of Polish cinema remained largely within a national framework but Polish cinema as well as many other Eastern European cinemas has been virtually excluded from new research in transnational cinema Polish Cinema in a Transnational Context addresses this lacuna in film studies offering extended analysis of this national cinema s global influence Contributors assess the reception of Polish films in Europe and North America Polish international coproductions the presence of Polish performers in foreign films and the works of subversive migr auteurs like Andrzej Zulawski and Walerian Borowczyk The collection presents familiar films and

filmmakers in a new and revealing light while also focusing on lesser known filmmakers and aspects of Polish cinema The resulting volume moves the discussion beyond the border of Polish national belonging Contributors Peter Hames Darragh O Donoghue Helena Goscilo Dorota Ostrowska Charlotte Govaert Eva N ripea Izabela Kalinowska Ewa Mazierska Alison Smith Lars Kristensen Jonathan Owen Michael Goddard Robert Murphy Kamila Kuc Elzbieta Ostrowska Ewa Mazierska is professor of film studies at the University of Central Lancashire Michael Goddard is senior lecturer in media at the University of Salford

**Environmentalism in Popular Culture**  
 Noël Sturgeon, 2022-04-12 In this thoughtful and highly readable book No 1 Sturgeon illustrates the myriad and insidious ways in which American popular culture depicts social inequities as natural and how our images of nature interfere with creating solutions to environmental problems that are just and fair for all Why is it she wonders that environmentalist messages in popular culture so often naturalize themes of heroic male violence suburban nuclear family structures and U S dominance in the world And what do these patterns of thought mean for how we envision environmental solutions like green businesses recycling programs and the protection of threatened species Although there are other books that examine questions of culture and environment this is the first book to employ a global feminist environmental justice analysis to focus on how racial inequality gendered patterns of work and heteronormative ideas about the family relate to environmental questions Beginning in the late 1980s and moving to the present day Sturgeon unpacks a variety of cultural tropes including ideas about Mother Nature the purity of the natural and the allegedly close relationships of indigenous people with the natural world She investigates the persistence of the myth of the frontier and its extension to the frontier of space exploration She ponders the popularity and occasional controversy of penguins and penguin family values and questions assumptions about human warfare as natural The book is intended to provoke debates among college students and graduate students among their professors among environmental activists and among all citizens who are concerned with issues of environmental quality and social equality
