Empirical Foundations of Information and Software Science Jagdish C. Agrawal,2012-12-06 The purpose of the Second Symposium on Empirical Foundations of Information and Software Science EFISS was in essence the same as that of the First Symposium in this series i e to explore subjects and methods of scientific inquiry which are of fundamental and common interest to information and software sciences and to map directions of research that will benefit from the mutual interaction of these two fields In fact one of the most important results of the First EFISS Symposium was the conclusion that the commonality of these two sciences is much more than just the commonality of their objects of study namely the study of informative and prescriptive properties of texts in all kinds of sign systems such as natural or artificial languages Rather the most challenging problems appear to be in the areas in which both these sciences overlap such as for instance the problem of trade offs between informative and prescriptive uses of texts This problem can be formulated in generic terms as follows given a certain kind of action or activity which has been prescribed to some agent i e which is required to be implemented or carried out what kind of information should be provided to the agent in what form and how should it be distributed over the contextual structure of the prescriptive text to enable the agent to carry out the action or activity most effectively and efficiently

Web Archives and Web Archiving Asger Harlung,2025-04-23 Web archives are repositories of content preserved from the World Wide Web not to be confused with other types of archives that offer services or content online Web archives preserve content that otherwise tends to disappear or change rapidly which probably makes them the most important initiative towards preservation of cultural heritage in our age Never before have the actions ongoing sentiments trends decision processes in politics business and industry institutions news media entertainment providers interest groups and individuals been documented or preserved at the level of detail offered by ongoing and systematic preservation of the Web with content from all levels of society This book strives to present the underlying methods and reasons for preserving web content with a focus on the principles rather than specific methods that may become obsolete almost as quickly as web pages may disappear and on detailing the nature of the archived results with its potentials and pitfalls
