The Order of Future Events Ray H. Hughes, 2012 **Does money matter in predicting future events?** Sebastian Diemer, 2014-02-01 Prediction markets are online trading platforms where contracts on future events are traded with payoffs being exclusively linked to event occurrence Scientific research has shown that market prices of such contracts imply high forecasting accuracy through effective information aggregation of dispersed knowledge This phenomenon is related to incentives for truthful aggregation in the form of real money or play money rewards The question whether real or play money incentives enhance higher relative forecast accuracy has been addressed by previous works with diverse findings The current state of empirical research in his field is subject to two inherent deficiencies First inter market studies suffer from market disparities and differences in the definition of underlying events Comparisons between two different platforms one for play money contracts one for real money contracts are potentially biased by different trading behaviour Second the majority of studies are based upon identical datasets of market platforms IOWA stock exchange Tradesports Intrade NewsFutures

The City of God Aurelius Augustinus (santo), 2012 Along with his Confessions The City of God is undoubtedly St Augustine's most influential work In the context of what begins as a lengthy critique of classic Roman religion and a defense of Christianity Augustine touches upon numerous topics including the role of grace the original state of humanity the possibility of waging a just war the ideal form of government and the nature of heaven and hell But his major concern is the difference between the City of God and the City of Man one built on love of God the other on love of self One cannot but be moved and impressed by the author's breadth of interest and penetrating intelligence Publisher's website
