Wlasuk, 2013-04-17 Why write another guide to observing the Moon That was the question I was pondering as I began this project having a fine collection of classic lunar guidebooks dating back to 1791 in my own library As a Fellow of the Royal Astronomical Society RAS member of the American Astronomical Society s Division for Planetary Sciences AAS DPS and member of the American

Geophysical Union AGU I am fortunate to know many professional lunar scientists who keep me up to date with developments in lunar science contrary to public perception lunar science has definitely not stagnated since the last Apollo No 17 left the surface of the Moon in December 1972 I am also lucky to know many amateur lunar observers who like me enjoy actually looking at the Moon with telescopes and imaging it with a wide variety of devices ranging from regular 35 mm cameras to video recorders and CCD cameras My friends who study the Moon whether in their professions or just for fun gave me several reasons for doing another lunar guidebook First the last lunar observer's guide of any length was published over ten years ago and many reviewers noted that it was badly out of date even then

Organizational Ethnography Sierk Ybema, Dvora Yanow, Harry Wels, Frans H Kamsteeg, 2009-08-20 Just as newspapers do not typically engage with the ordinary experiences of people's daily lives so organizational studies has also tended largely to ignore the humdrum everyday experiences of people working in organizations However ethnographic approaches provide in depth and up close understandings of how the everydayness of work is organized and how in turn work itself organizes people and the societies they inhabit Organizational Ethnography brings contributions from leading scholars in organizational studies that serve to unpack an ethnographic perspective on organizations and organizational research The authors explore the particular problems faced by organizational ethnographers including questions of gaining access to research sites within organizations the many styles of writing organizational ethnography the role of friendship relations in the field problems of distance and closeness the doing of at home ethnography ethical issues standards for evaluating ethnographic work This book is a vital resource for organizational scholars and students doing or writing ethnography in the fields of business and management public administration education health care social work or any related field in which organizations play a role

Organizations Jan Achterbergh, Dirk Vriens, 2009-08-07 to do to ensure survival and 2 principles for designing organizational structures in such a way that they can realize the required functions adequately In the course of their elaboration we will show that these principles are general i.e. that they hold for all organizations 1.5 Conceptual Background To describe organizations as social systems conducting experiments and to present

principles for designing an infrastructure supporting the social experiment we use concepts from organizational cybernetics social systems theory and Aristotle s ethics In this book we hope to show that concepts from these traditions as introduced by their relevant representatives can be integrated into a framework supporting our perspective on organizations To this purpose we introduce in each of the following chapters relevant concepts from an author belonging to one of these three traditions and show how these concepts contribute to either describing organizations as social experiments in Part I of the book to formulating principles for the design of functions and organization structures supporting meaningful survival Part II or to formulating principles for the design of organization structures enabling the rich sense of meaningful survival Part III Of course the relevance of cybernetics social systems theory and Aristotle s ethics can only be understood in full after they have been treated in more detail but based on what we said above it may already be possible to see why these theories have been chosen as conceptual background
