Touching the Hearts of Students George Van Grieken, 1999 This volume is a resource for teachers administrators board members and all who are engaged in Lasallian educational ministries today It reflects on the life and times of De La Salle and the early Institute and their significance in today's educational world There are questions at the end of each chapter along with a description of the Lasallian School as found in the tradition The book contains an extensive annotated bibliography of Lasallian resources as well as a glossary of Lasallian terms A model Lasallian Mission and Vision Statement gives any Lasallian group an excellent example of such statements

Innovation in Early Modern Catholicism Ulrich L. Lehner, 2021-11-29 This volume demonstrates that the Catholic rhetoric of tradition disguised both novelties and creative innovations between 1550 and 1700 Innovation in Early Modern Catholicism reveals that the period between 1550 and 1700 emerged as an intellectually vibrant atmosphere shaped by the tensions between personal creativity and magisterial authority The essays explore ideas about grace physical predetermination freedom and probabilism in order to show how the rhetoric of innovation and tradition can be better understood More importantly contributors illustrate how disintegrated historiographies which often excluded Catholicism as a source of innovation can be overcome Not only were new systems of metaphysics crafted in the early modern period but so too was a new conceptual language to deal with the pressing problems of human freedom and grace natural law and Marian piety Overall the volume shines significant light on hitherto neglected or misunderstood traits in the understanding of early modern Catholic culture Representing early modern Catholicism more crucially than any other currently available study Innovation in Early Modern Catholicism is a useful tool for advanced undergraduates postgraduates and scholars in the fields of philosophy early modern studies and the history of theology

(dela Salle) , **The Catholic Periodical Index, a Cumulative Author and Subject Index to a Selected List of Catholic Periodicals** ,1963 **Neoliberalizing Educational Reform** Keith M. Sturges,2015-02-27 In this era when commonsense in educational discourse is so deeply framed by neoliberalism we must better understand both the uniquely situated and the insidiously interconnected nature of so called reforms Thank you to Keith M Sturges and colleagues for illuminating exactly this in their important and hard hitting new book that reveals not

merely how neoliberal reforms are designed to reinforce inequity but also how the contradictions within provide ample opportunity to collectivize and act with hope Kevin Kumashiro author of *Bad Teacher How Blaming Teachers Distorts the Bigger Picture* In this important volume editor Keith M Sturges has taken the most useful discussions of neoliberalism and with great precision clarity and utility seen them applied to the education arena Over 13 chapters leading education thinkers lay bare sets of realities that the broader public school administrators and policy makers would do well to fully understand These range from the impact of neoliberal thinking upon chartering parent involvement teacher training school climate funding and more I ll be using the chapters in this text in a variety of ways They ll inform conversations with local state and federal policy makers and inform conversations with school leaders and district leaders I ll also be assigning the text in my graduate seminar on education policy Finally the chapters will inform several lectures in my undergraduate class on *The Promise and Peril of Public Education* What a gem of a volume Kevin Michael Foster Executive Director The Institute for Community University and School Partnerships ICUSP [Exploring, Experiencing, and Envisioning Integration in US Arts Education](#) Nancy H. Hensel, 2018-01-16 This book explores the dedication of the New American Colleges Universities to the purposeful integration of liberal education professional studies and civic engagement through the performing literary and visual arts Examples of course level and programmatic integration of the arts are discussed from both an applied practice based approach and a philosophical framework that posits student benefit from exploring experiencing and envisioning creativity in their future professions The authors believe that the development of professional skills in combination with the theoretical aspects of liberal arts curriculum which traditionally includes music theatre art and literature provides a high quality undergraduate educational experience that uniquely prepares students for adaptability in their careers and engaged citizenship grounded in the ability to think creatively critically and ethically *Transforming Universities in the Midst of Global Crisis* Richard Hil, Kristen Lyons, Fern Thompsett, 2021-12-22 This book calls into question the colonial and neoliberal university presenting alternative models of higher education that can more effectively respond to today s intersecting social economic environmental and political crises The authors argue that universities should be driven by a different set of core values one that promotes the common good over private or commercial interests individualism and market fundamentalism Presenting a broad range of educational initiatives from around the world that reflect life affirming regenerative and relational practices Indigenous intellectual sovereignty and principles of social and ecological justice the authors contend that pathways toward transforming higher education already exist within and without the university This task say the authors is urgent and necessary if universities and other institutions are to hold relevance in a rapidly changing global environment This book makes a unique contribution to critiques of the modern neoliberal university by looking for alternatives within and beyond traditional institutions of higher education In doing so the authors dismantle the longstanding ivory tower image of the university instead resituating education within broader social and ecological communities *Transforming Universities in*

the Midst of Global Crisis is aimed at all those who have a direct or indirect interest and stake in universities from the general reader to futurists ecologists as well as students academics administrators managers policy makers and politicians
