

# Textual Criticism

## Old Testament

A branch of literary criticism that is concerned with the identification and removal of transcription errors in the texts of manuscripts.

There are three fundamental approaches to textual criticism: eclectic, semantic, and copy-text editing. Techniques from the biological discipline of cladistics are currently also being used to determine the relationships between manuscripts.

Textual criticism is the study of the texts of scripture. (what they say and what we can learn from the study of various versions and manuscripts.)

The textual critic seeks to reconstruct the original text.

There are thousands of copies of verses, chapters, and books of the Bible that have been discovered. The entire Bible is well attested in antiquity. There are far more copies of it preserved from ancient times than there are of Homer, Socrates, or Virgil, or any of the Classics. Thus the Bible is the best attested document of the ancient world.

Textual criticism is the modern name used for the original text in the Bible. Lower criticism was name used before.
