Galili, 2017-09-05 The Natural Anti Gal Antibody as Foe Turned Friend in Medicine provides a comprehensive review of the natural anti Gal antibody which is the most abundant antibody in humans constituting 1% of immunoglobulins and the carbohydrate antigen it recognizes the a gal epitope It discusses the discovery of this antigen antibody system its evolution in mammals the pathological effects of this antibody and its possible use in various therapies in humans Most significantly the book discusses microbial and regenerative therapies in which an antibody present in all humans may be harnessed as an in

Fashionable Newspaper Claire Knowles,2023-09-15 This book explores Della Cruscan poetry in the late eighteenth century literary scene A sociable ornate and deeply theatrical type of poetry Della Cruscanism was associated with writers like Robert Merry Mary Robinson and Hannah Cowley While Merry is the poet most commonly associated with the Della Cruscan school this book argues that Della Cruscanism was a movement dominated by female poets and that this was one of the key reasons for the later disavowal and downgrading of its poetic accomplishments It offers a close examination of these women writers and their role in shaping the poetic culture of the fashionable newspaper In doing so this study offers the first account of the feminization of the fashionable newspaper and of popular literary culture in the final years of the eighteenth century **Origin of Group Identity** Luis P. Villarreal,2008-12-10 A sense of belonging is basic to the human experience

But in this humans are not unique Essentially all life from bacteria to humans have ways by which it determines which members belong and which do not This is a basic cooperative nature of life I call group membership which is examined in this book However cooperation of living things is not easily accounted for by current theory of evolutionary biology and yet even viruses display group membership That viruses have this feature would likely seem coincidental or irrelevant to most scientist as having any possible relationship to human group identity Surely such simple molecular based relationships between viruses are unrelated to the complex cognitive and emotional nature of human group membership Yet viruses clearly affect bacterial group membership which are the most diverse and abundant cellular life form on Earth and from which all life has evolved Viruses are the most ancient numerous and adaptable biological entities we know And we have long recognized them for the harm and disease they can cause and they have been responsible for the greatest numbers of human deaths However with the sequencing of entire genomes and more recently with the shotgun sequencings of habitats we have come to realize viruses are the black hole of biology a giant force that has until recently been largely unseen and historically ignored by evolutionary biology Viruses not only can cause acute disease but also persist as stable unseen agents in their host Mark Twain Stuart Hutchinson,1994 This book explores Twain s major writings as they address the New World and the Old race slavery imperialism the possibility of American literary form and the limits of humour Twain s humour is an expression of the pleasure and fun of life but it is also a response to ultimate contradictions and losses It is particularly American in that it rarely points to harmonies that might actually be enjoyed beyond itself It is the humour of someone always on the move if not on the run The absence of any destination in Twain other than the ultimate one of death is why his

work is so formally unsettled There is no point of clarification where author narrator and readers can be expected to arrive together Texts treated in this book include The Innocents Abroad Roughing It Tom Sawyer Huckleberry Finn Life on the Mississippi The Gilded Age A Connecticut Yankee Pudd'nhead Wilson Following the Equator The Mysterious Stranger and several short pieces

Man Across the Sea Carroll L. Riley, J. Charles Kelley, Campbell W. Pennington, Robert L. Rands, 1976-07-01 Whether humans crossed the seas between the Old World and the New in the times before Columbus is a tantalizing question that has long excited scholarly interest and tempted imaginations the world over From the myths of Atlantis and Mu to the more credible perhaps but hardly less romantic tales of Viking ships and Buddhist missionaries people have speculated upon what is after all not simply a question of contact but of the nature and growth of civilization itself To the specialist it is an important question indeed If people in the Western Hemisphere and in the Eastern Hemisphere developed their cultures more or less independently from the end of the last Ice Age until the voyages of Columbus the remarkable similarities between New World and Old World cultures reveal something important about the evolution of culture If on the other hand there were widespread or sustained contacts between the hemispheres in pre Columbian times these contacts represent events of vast significance to the prehistory and history of humanity Originally delivered at a symposium held in May 1968 during the national meeting of the Society for American Archaeology the papers presented here by scholars eminent in the field offer differing points of view and considerable evidence on the pros and cons of pre Columbian contact between the Old World and the New Various kinds of data archaeological botanical geographical and historical are brought to bear on the problem with provocative and original results Introductory and concluding remarks by the editors pull together and evaluate the evidence and suggest ground rules for future studies of this sort Man across the Sea provides no final answers as to whether people from Asia Africa or Europe visited the American Indian before Columbus It does however present new evidence suggested lines of approach and a fresh attempt to delineate the problems involved and to establish acceptable canons of evidence for the future
