The Open Spaces Of London:

City Gardens Brian Plummer, Don Shewan, 1992 The historic City of London the Square Mile is one of the world's most densely built up urban areas yet within this close grained urban fabric exist a great number of green oases gardens and open spaces which provide recreation and respite for thousands who work in the City This authoritative and lavishly produced work illustrated in full colour throughout provides a guide inventory and appraisal of all the open spaces in the City A specially designed full colour Trails section allows visitors and locals to explore familiar and less familiar corners of the city As both a major land use survey and an unusual addition to London's guidebook literature this book will have wide appeal

Urban Open Spaces Helen Woolley, 2003-09-02 There is enormous interest in urban design and the regeneration of our urban areas but current thinking often concentrates on the built form forgetting the important role that open spaces play Urban Open Spaces brings together extensive research and practical experience to prove the opportunities and benefits of different types of open space to society and individuals Focusing on the importance of open spaces in daily urban life the book is divided into three sections The first section describes the social health environmental and economic benefits and opportunities that open spaces can provide The second section discusses the different types of urban open spaces that individuals or communities might use on a daily basis from private gardens to commercial squares and waterway corridors The final section provides best practice case studies demonstrating urban spaces being incorporated in new developments and community initiatives This is the first book to bring together a variety of evidence from different disciplines to outline the benefits and opportunities of urban open spaces in an accessible way Not just for students and practitioners this book will be of value for anyone interested in the design development regeneration funding and use of open spaces in urban areas

The European City and Green Space Peter Clark, 2016-12-05 Recent years have seen sustained public debate and controversy over the greening of European cities associated with the environmental movement pressures of urban redevelopment and the promotional strategies of cities competing in a global market But the European debate over urban green space has a long history dating back to Victorian concerns for the green lungs of the city to combat the health and social problems caused by rapid population and industrial growth This book explores the multiplicity of green space developments in the modern city ranging over parks and commons garden suburbs and the cities in the park allotment gardens green belts and national urban parks It is concerned not only with the different types of green space but the many influences shaping their evolution from international planning ideas to the rise of modern day sport and leisure and the effects of the transport revolution No less vital in this story is the interaction of the many actors involved in the often fractious political process of creating green spaces architects and planners politicians developers and other businessmen NGOs and local residents This volume is particularly concerned with contexts how international planning ideas are transmitted and adapted in different European cities how the construction of green space is affected by local power structures and relationships and how ordinary people

perceive and use green spaces quite often at variance with official designs The European City and Green Space looks at these and other issues through the prism of four metropolises London Stockholm Helsinki and St Petersburg All represent different types of North European city yet each has experienced distinctive economic political and cultural trajectories whilst also facing powerful challenges and problems of similar kinds with regard to green space This volume examines how each has responded to them and what patterns emerge **The Laws of England** Hardinge Stanley Giffard Earl of Halsbury, 1912
