The Animal-human Boundary Angela N. H. Creager, William C. Jordan, 2002 An examination of the difficulties in fundamentally differentiating humans from all other animals *Neuroethology* J.-P. Ewert, 2012-12-06 Historically the search for the neural bases of behavior goes back a long way Neuroethology which is concerned with the experimental analysis of the releasing and control mechanisms of behavior is a young discipline Results from this multidisciplinary branch of research which uses physical chemical and mathematical methods have not yet been extensively treated in textbooks of neurophysiology and ethology This book is intended as a first attempt to pose major questions of neuroethology and to demonstrate by means of selected research examples some of the ways by which these questions are being approached Inevitably this cannot be a complete and in depth detailed treatment of all of the neurobiology examples and I realize that such a selection is of a subjective nature The overall goal of the book is to present an introduction After outlining some of the very basic neurophysiological and ethological concepts Chaps 2 and 3 neuroethological questions and methods are demonstrated extensively by means of a particular example Chap 4 There are two reasons to choose the visually guided prey catching and avoidance behavior of the Common Toad 1 it is a system which I have investigated for about fifteen years and therefore know best 2 the toad story is one of the most comprehensive neuro ethological approaches so far Thus it is possible here to outline the major concepts of neuroethology and to pose the basic questions The Earth Encompassed Peter J. human languages The mechanism of cell differentiation and the rapid acceleration of information technology in the 21st century are also discussed With various research disciplines becoming increasingly interrelated today Information Theory and Evolution provides nuance to the conversation between bioinformatics information technology and pertinent social political issues This book is a welcome voice in working on the future challenges that humanity will face as a result of scientific and technological progress
