scholars of Islamic studies reflects current thinking about the past and present condition of Islam in China. It has a strong focus on China's north west, the most important region for the study of Islam in China. Most contributions relate to the Hui Chinese speaking Muslims of Gansu and Qinghai provinces and the Ningxia Hui Autonomous Region but there are also chapters on the Uyghurs of Xinjiang. An important feature of this book is the attention paid to the Sufi orders, the role of these networks which embody an inner directed and mystical aspect of Islam is crucial to the understanding of Muslim communities in both historical and contemporary China.

Buddhist Statues in Tibet Ulrich von Schroeder, 2008. Mostly unknown to the outside world, the temples and storerooms of Tibet's monasteries shelter a great number of ancient Buddhist objects including rare examples originating from India, Pakistan, Afghanistan, Nepal, Burma, and China. Hitherto books on this subject are almost exclusively illustrated with objects scattered worldwide in private or public collections. A notable exception is the monumental two volume chronicle *Buddhist Sculptures in Tibet* published in 2001 by this author. This book is a condensed edition introducing the very finest examples that illustrate the development of art in the round in Tibet. Effectively acting as a catalogue, it also serves to ensure the objects remain where they are. The free DVD contains 527 digital images that can be freely used. It is the hope of the author that other scholars will take use of this opportunity to publish some of these wonderful Buddhist sculptures.

The Golden Yoke Rebecca Redwood French, 2019-06-07. The Golden Yoke is a remarkable achievement. It is the first elaboration of the legal, cultural and ideological dimensions of precommunist Tibetan jurisprudence, a unique legal system that maintains its secularism within a thoroughly Buddhist setting. Layer by layer, Rebecca Redwood French reconstructs the daily operation of law in Tibet before the Chinese invasion in 1959. In the Tibetans' own words, French identifies their courts, symbols and personnel and traces the procedures for petitioning and filing documents. There are stories here from judges, legal conciliators and lay people about murder, property disputes and divorce. French shows that Tibetan law is deeply embedded in its Buddhist culture and that the system evolved not from the rules and judgments but from what people actually do and say. In what amounts to a fully developed cosmology, she describes the cultural foundation that informs the system: myths, notions of time and conflux, inner morality, language patterns, rituals, use of space, symbols and concepts. Based on extensive readings of Tibetan legal documents and codes, interviews with Tibetan scholars and the reminiscences of Tibetans at home and in exile, this generously illustrated, elegantly written work is a model of outstanding research. French combines the talents of a legal anthropologist with those of a former law practitioner to develop a new field of study that has implications for other judicial systems including our own.

The spread of Islam Ruben Ygua, 2025-04-10. Traditional methods of studying the past have always given greater importance to nationalist, religious and moral interests which subordinated the historical fact to the System point of view. That's how we have been educated. The

time has come to simplify and show respect for our ancestors striving to know what really happened in the past and not just what they want to inform us about After so many years of studying History I came to the conclusion that the best study system is through an impartial objective Chronology that just put each event in its exact place in time revealing History without manipulation This Chronology contains not only purely political facts such as the foundation of cities the birth of kingdoms and empires scientific and geographical discoveries natural disasters and epidemics it also includes information on the most different fields of human activity chemistry astronomy geography mathematics and so on In parallel the chronology is complemented by data that do not belong to a specific date but to an entire epoch they are each society generalities curiosities customs the religion of each civilization inventions or discoveries that cannot be placed in an exact date etc The result of all this set is one of the most complete chronologies within its reach periodically updated with the latest archaeological and scientific discoveries and that transforms the reader into an eyewitness of the past understanding the relation of geographically distant facts to each other but closely connected in time and influencing unexpected consequences This is something that traditional history has generally ignored when it was not usable A work of this magnitude could not be published in a single book so I have divided it into several collections and the Spanish originals are being translated into French English Italian and Portuguese The chronology goes from prehistory to the present day year by year as far as possible For those who prefer a deeper and more detailed study I have prepared a second chronology day by day which for now covers from 1789 to 1946 divided into five collections
