Language ,1984-01-01 The topic of this bibliography in its broadest sense is the subject of a wide range of academic disciplines Given these circumstances the particular associations and connotations of the terms transfer and interference in each of these areas are legion with resultant differences in meaning in the disparate literature on these subjects And yet it is in one way or another contact and interaction of languages in the speaker hearer and learner in language acquisition contexts as well as in society in general which is basic to these two concepts throughout the various disciplines The discovery of this basic unitary notion is surely one of the reasons for the new interest in these phenomena In light of all this a bibliography cannot at present avoid being highly selective in order to demarcate an interdisciplinary area of research in its own right and with its own status The establishment of such an area is one of our main aims The focus of interest in this bibliography admittedly is directed towards the psycholinguistics of language contact and interaction **Routledge**

Comprehension Strategies in the Acquiring of a Second Language Harris Winitz,2020-10-08 This book provides a critical analysis and account of the development of the Comprehension Approach as a method for language learning The author draws on interrelated sub fields including linguistic theory child language acquisition and educational technology to examine how a comprehension based strategy could have pedagogical potential for adult second language learning While

second language pedagogy has to date been dominated by production models this book takes another look at the Comprehension Approach as a possible alternative presenting results from both child first language and adult second language contexts It will be of interest to psycholinguistics and applied linguistics scholars particularly those with an interest in second language teaching and learning Resources in Education ,1991-04 **A Manual for Indochinese Refugee Education, 1976-1977** National Indochinese Clearinghouse and Technical Assistance Center,1976 The Second Time Around □ Minimalism and L2 Acquisition Julia Herschensohn,2000-02-15 Linking recent advances in theoretical syntax and empirical research in language development the book claims that second language acquisition is not totally distinct from first language acquisition but rather is a replay a relearning of language It argues that Universal Grammar is a template guiding acquisition of L1 while constraining acquisition of L2 Assuming that a syntactic distinction crucial for language and its acquisition is the division between lexical and functional categories it argues that the key to L2 as well as L1 acquisition of syntax is the mastery of morphological features and their linking to functional categories It thus supports the availability of UG to the second language learner and the minimalist claim that cross linguistic variation is morpholexical Constructionism the hypothesis of L2A proposed in this account argues for a period of feature underspecification after loss of the L1 value followed by a progressive building of the L2 value through specific constructions **Effective Techniques for English Conversation Groups** Julia M. Dobson,1981 **Affective, Interactive and Cognitive Methods for E-Learning Design: Creating an Optimal Education Experience** Tzanavari, Aimilia,Tsapatsoulis, Nicolas,2010-01-31 This book focuses on the study and application of human computer interaction principles in the design of online education Provided by publisher
