Special Animal Senses:

Special Animal Senses Mary Mackill, 2006 Children can find out about the special senses some animals have and how these senses help them survive in the world around them Learn that butterflies taste with their feet and a snail uses its antennae to touch Chapters beginning with questions help children focus on key ideas and helps them learn to form their own questions A picture glossary visually reinforces and clarifies new words *Amazing Animal Senses* John Townsend, 2019-05-01 In *Amazing Animal Senses* readers learn about some animals super sensing skills Simple leveled text accompanies vivid images and engaging design to make these books a popular choice GK Joyride 4 Joy Bhattacharjya, GK Joyride series for classes 1 through 8 renews the relevance of General Knowledge in the age of the Internet social media platforms and information overload Remaining strongly rooted in the tenets of the National Curriculum Framework it also acknowledges the changing terrain of knowledge acquisition Sensational Animal Senses Leanne Boucher Gill, PhD, 2024-08-13 *Sensational Animal Senses* explores the world of senses and perception in both human and non human animals Readers will delight in the wonders of our six senses vision hearing touch taste smell and balance plus exotic senses that some non human animals have like heat vision magnetic senses and bioelectricity Have you ever wondered how we see color know which way is up or why we get goosebumps How do we determine what is a good smell from stinky stuff And what if a tree falls in the woods and no one is around to hear it does it make a sound Or have you ever wondered why dogs hear things we can't or why some cats seem to see ghosts How do animals navigate over large distances flying north to south or swimming from one part of the ocean to another without getting lost To answer these questions and more peek inside *Sensational Animal Senses* Living in a Noisy Smelly Tasty Slimy Topsy Colorful World You'll learn about each of our six senses vision hearing taste smell touch and balance and about some senses we don't have but animals do like heat vision magnetoreception and electroreception You'll learn how scientists research the wonderful colorful loud delicious and smelly world we inhabit and how our brains and nervous system process that sensory information to give rise to our perceptions as we make sense of the world around us And you'll see just how important brains are to make sense of your senses Plus you'll read real world examples of science in action as well as stories about people who work with animals like park rangers animal researchers K9 police officers veterinarians and conservationists Also included are simple experiments to help you discover how senses work while testing the limits of your sensory systems The Genesis Beast Gerald Lattocha Jr, 2022-12-05 The reading of Will Smythe's will was supposed to be a somber event In his youth Will had almost disavowed his relatives and decided to have a reading of his will before he died of cancer It should have been noticed that Will's intent was anything but honorable but upon signing of the will it would be revealed just how far Will would go to reach immortality Unknown to Will's guests he had a deadly secret Now the guests would have to find a way to beat the mysterious and ferocious Genesis Beast So what form will the Genesis Beast be next A crocodile A T Rex It was a creature that could turn into any form of prehistoric

carnivore and generate its optimum hunting environment So would the guests survive this horrible creature or would they all succumb to the nature of the beast and give William his total immortality Can they find a way to beat it Only by reading this story can one discover this outcome and find out the thrilling outcome of a good versus evil plot **The Ecology of Animal Senses**

Gerhard von der Emde, Eric Warrant, 2015-12-16 The collection of chapters in this book present the concept of matched filters response characteristics matching the characteristics of crucially important sensory inputs which allows detection of vital sensory stimuli while sensory inputs not necessary for the survival of the animal tend to be filtered out or sacrificed The individual contributions discuss that the evolution of sensing systems resulted from the necessity to achieve the most efficient sensing of vital information at the lowest possible energetic cost Matched filters are found in all senses including vision hearing olfaction mechanoreception electroreception and infrared sensing and different cases will be referred to in detail **Animal Senses**
