Special Care Babies And Their Developing Relationships:

Special Care Babies and their Developing Relationships Dr Anne Mcfadyen, 2019-10-25 Special care babies are at the centre of a complex system of relationships involving both family members and professionals. Prematurity, disability and life threatening situations create a crisis which is likely to have a different meaning for each participant. Each baby's developing relationships will both influence and be influenced by relationships within the hospital and the family system. **Special Care Babies and their Developing Relationships** puts professionals in touch with how babies, their parents and the staff who care for them actually experience neonatal care. The book explores institutional, cultural and family beliefs about prematurity and considers the differences in beliefs and in needs of parents and staff. Anne McFadyen argues that to support the key mother-child relationship, these differences must be acknowledged as they are at the heart of the relationship between two crucial systems which have the power to influence the baby's survival and the rest of his or her life.

Therapeutic Approaches with Babies and Young Children in Care Jenifer Wakelyn, 2019-07-10 **Therapeutic Approaches for Babies and Young Children in Care** Observation and Attention is about the value of observation and close attention for babies and young children who may be vulnerable to psychological and attachment difficulties. Case studies explore the potential for observation-based therapeutic approaches to support caregivers, social workers and professional networks. A third theme in the book is the roots of observation-based approaches in psychoanalytic infant observation and the contribution of these ways of working to professional training and continuing development. Using case examples, Jenifer Wakelyn illustrates observational ways of working that can be practised by professionals and family members to help children express themselves and feel understood. The interventions focus on the early stages of life in care and on the golden thread of relationships with caregivers. The book explores contemporary neuroscience and child development research alongside psychoanalytic theory to explore the role of attention in helping children to develop the internal continuity that sustains the personality and protects against the fragmenting impact of trauma. **Therapeutic Approaches for Babies and Young Children in Care** is written for social workers, teachers, medical staff and other professionals whose work brings them in contact with the youngest children in care; it will also be relevant for commissioners, managers and trainers as well as mental health clinicians who are starting to work with children in care. It will provide a valuable insight into the lives of infants and young children in the care system and the applications of psychoanalytic infant observation.

Born Too Early Jonna Jepsen, 2018-04-24 Premature children suffering consequences of their early birth do not grow out of them and new difficulties may appear as they mature The sum of negative influences from the time in the Neonatal Intensive Care Unit eventual problems with interaction and later a defective or delayed development can cause continuous problems for premature children These children can however be protected if we initiate the necessary support An early effort can prevent the typical consequences of pre term birth so that the children will have quite a normal childhood If the minor difficulties are identified it is possible to take care of them before they develop into huge problems and that is just the purpose of this book to give parents and professionals close to the child a possibility to prevent repair and rebuild Born Too Early does not deal with the more usual handicaps but exclusively with the less visible consequences of pre term birth which are rarely diagnosed

Multiple Voices John Byng-Hall, Renos K. Papadopoulos, 2018-04-24 Part of the Tavistock Clinic Series this book focuses on narrative and stories in Family Systems Therapy particularly on how stories develop within the domain of a therapist s own theoretical clinical and professional contexts The aim is to allow the reader to understand the uses of stories in family therapy This book offers a comprehensive overview of issues related to narrative which appear in a family therapy setting Originally embarking on a joint project to share clinical experience members of the Family Systems Group at the Tavistock Clinic discovered that what was common in their work was their emphasis on narrative This discovery led in time to the development of a shared discourse about their diverse approaches to narrative which are carefully reflected in the contributions in this volume Part One sets out the context of narrative with contributions on bilingualism and the family s experience of therapy ending with a thought provoking critique of narrative Part Two concentrates on applications of these ideas providing analysis of multiple narratives in illness and loss gender and language neonatal care adoption divorce and refugee families

Breastfeeding Janet Dalzell, Elizabeth Rogerson, 2018-10-08 In recent decades global healthcare professionals and organisations have formed a wide evidence based consensus that breastfeeding is usually the best option for both mother and baby However women and professionals alike often face a sea of shifting attitudes and values and complex social cultural political and economic factors that may influence women s feeding decisions This book examines the global evidence and the factors that affect women s decisions around initiating breastfeeding and maintaining it through the

first year of their children's lives. It outlines potential areas for development and policy change at practitioner and strategic levels and shows how health professionals can effectively communicate and provide information to help women make unpressured but informed decisions. **Breastfeeding: Contemporary Issues in Practice and Policy** is essential reading for healthcare professionals, policy movers and shapers and all those with an interest in breastfeeding who wish to influence the development of related policies, practices and healthcare services. **Twins & Multiple Births** Carol Cooper, 2011-05-31. Updated in 2013 with the latest statistics and guidelines, this inspiring and enlightening parenting guide is for all parents of twins or more. It's written by a practising GP and mother of twins who seamlessly combines her medical know-how with first-hand experience of having more than one baby at once. With statistics on multiple births and useful resources as well as information on topics such as fertility treatment, advances in prenatal medicine and surgery, feeding, schooling and looking after sick twins, this book offers first-hand professional, practical and emotional advice to help parents cope with the development and rearing of twins from conception to adulthood. Particular emphasis is placed on the relationship between twins as individuals as they grow up, their relationship with others both inside and outside the family and sibling rivalry. Also incorporating standard information on pregnancy, birth, what to expect and how the process differs from single births, this is an essential, enlightening and often amusing guide for every parent of twins. **New Discoveries in Child Psychotherapy** Margaret Rustin, Michael Rustin, 2019-05-28. **New Discoveries in Child Psychotherapy** presents eleven new contributions to child psychoanalytic research, most of them based on the experience of the clinical consulting room. Each chapter is the work of an experienced child psychotherapist or child analyst, vivid in their description of the children and families they encountered. Their understanding of the inner worlds of patients and the clinical consulting room is clearly evidenced in their analysis of clinical presentations. The chapters are the result of the psychoanalytic clinical and observational practices of their authors, allied to their use of rigorous qualitative research methods in particular: Grounded Theory and interpretative phenomenological analysis (IPA). They describe developments of child psychoanalytic knowledge in several fields, including autism, psychotherapy with severely deprived children and the study of early infancy. They demonstrate advances in child psychoanalytic theories and methods and the development of new forms of clinical service provision. Contested issues in psychoanalytic research are thoroughly evaluated, showing how it can be made more accountable and rigorous through the adaptation of established qualitative research methods to the study of unconscious mental phenomena. **New Discoveries in Child Psychotherapy** will be an essential text in the field of child psychoanalysis and will be highly useful in psychotherapy and psychoanalysis training courses and for psychoanalytic researchers as well as for practitioners. **The Developing Person Through Childhood** Kathleen Stassen Berger, 2005-10-14.
