## **Philosophy of Life - The Book of Basics**

Wolfgang Fries, 2022-11-22 Philosophy should give the human being a mental basis that will allow man to lead a happy life and solve the problems of the now. Philosophy does not consist of making things complicated and incomprehensible like today's degenerate philosophies do. In this book no philosophical phrases are discussed in order to play mental soccer. This book gives basics about life which one can apply to lead to a fulfilled happy existence. Basic questions about life itself are solved. What is life? What is man? Is it that a creature arose from mud by chance as science tells you? Or is it that matter is motivated by a soul as the priest makes you believe? Why does man think the way he thinks? What is the goal of existence?

**Big Data Analytics for Cyber-Physical System in Smart City** Mohammed Atiquzzaman, Neil Yen, Zheng Xu, 2020-01-11 This book gathers a selection of peer reviewed papers presented at the first Big Data Analytics for Cyber Physical System in Smart City BDCPS 2019 conference held in Shengyang China on 28-29 December 2019. The contributions prepared by an international team of scientists and engineers cover the latest advances made in the field of machine learning and big data analytics methods and approaches for the data driven co design of communication computing and control for smart cities. Given its scope it offers a valuable resource for all researchers and professionals interested in big data smart cities and cyber physical systems.

**Soft Computing Evaluation Logic** Jozo Dujmovic, 2018-09-10 A novel approach to decision engineering with a verified framework for modeling human reasoning. Soft Computing Evaluation Logic provides an in depth examination of evaluation decision problems and presents comprehensive guidance toward the use of the Logic Scoring of Preference LSP method in modeling complex decision criteria. Fully aligned with current developments in computational intelligence the discussion covers the design and use of LSP criteria for evaluation and comparison in diverse areas such as search engines medical conditions real estate space management habitat mitigation projects in ecology and land use and residential development suitability maps with versatile transfer to other similar decision modeling contexts. Human decision making is rife with fuzziness imprecision uncertainty and half truths yet humans make evaluation decisions every day. In this book such decision processes are observed analyzed and modeled. The result is graded logic a soft computing mathematical infrastructure that provides both formal logic and semantic generalizations of classical Boolean logic. Graded logic is used for logic aggregation in the context of evaluation models consistent with observable properties of human reasoning. The LSP method based on graded logic and logic aggregation is a vital component of an industrial strength decision engineering framework. Thus the book provides detailed theoretical background for graded logic. Provides a theory of logic aggregators. Explains the LSP method for designing complex evaluation criteria and their use. Shows techniques for evaluation comparison and selection of complex systems as well as the cost suitability analysis optimization sensitivity analysis tradeoff analysis and missingness tolerant aggregation. Includes a survey of available LSP software tools including ISEE ANSY and LSP NT. With
