

Special Interest Group Presentations

Teacher Instructions

In preparation for lessons on voter demographics, issue networks, campaign contributions, or anything else that would require students to understand the linkage institutions that connect the populace with the government, the study of special interest groups and grass roots organizations is vital.

Select one day per week for one to three students to give a presentation on their selected group. Students can self-schedule through almost all the learning management systems used by most schools. Or a calendar can be posted in the classroom.

Time: 3 to 10 minutes one day per week.

Materials: access to the internet, student handout, log.

Preparation: Write MADD, Sierra Club, and NRA on the board. Ask students to explain what they are and why they exist. Be sure to stress the following points:

Special interest groups (advocacy groups or pressure groups) are associations of individuals or organizations organized to influence public policy in their favor.

They raise money from private donations.

They spend money on public awareness of their issues.

They hire lobbyists to pressure lawmakers to pass legislation in their favor.

They exist in all categories and levels - from local issues to international organizations.

Project a special interest organization's website to model the required items students are to address.

Have students keep a log of the groups presented for a future lesson on linkage institutions, iron triangles, citizenship, etc.

Interest Groups in American Politics Anthony J. Nownes,2013-01-17 Americans rail against so called special interests but at the same time many members of society are themselves represented in one form or another by organized groups trying to affect the policymaking progress This concise but thorough text demonstrates that interest groups are involved in the political system at all levels of government federal state and local and in all aspects of political activity from election campaigns to agenda setting to lawmaking to policy implementation Rather than an anomaly or distortion of the political system it is a normal and healthy function of a pluralist society and democratic governance Nonetheless Nownes warns of the dangers of unwatched interest group activity especially in the realms of the electoral process and issue advocacy Interest Groups in American Politics Second Edition is grounded by the role of information in interest group activity a theme that runs through the entire book This much anticipated revision of Nownes s text retains a student friendly tone and thoroughly updates the references to interest group research as well as adds a new chapter on the

connections between interest groups and political parties Numerous figures and tables throughout the book help students visualize important trends and information

New Directions in Interest Group Politics Matt Grossmann, 2013-10-23 Reflecting cutting edge scholarship but written for undergraduates New Directions in Interest Group Politics will help students think critically about influence in the American political system There is no shortage of fear about the special interests in American political debate but reliable information about what interest groups do who they represent and how they influence government is often lacking This volume comprised of original essays by leading scholars is designed to summarize and explain contemporary research that helps address popular questions and concerns making studies accessible to undergraduate students and providing facts to buttress informed debate The book covers the mobilization of interest groups their activities and their influence Each chapter briefly reviews research on a central question of scholarship before focusing on a particular empirical project designed to shed light on the topic Rather than simply providing a descriptive overview the chapters are designed to foster critical thinking by getting students to assess the role of interest groups in the American political system and supplying evidence of their effects Importantly a set of web resources associated with the book offer instructions for research and writing assignments Students will be able to collect and analyze data on campaign finance lobbying and interest group involvement in governance The eResource website includes materials for several classroom simulations such as an interest group legislative battle a Netroots convention and a rule making process As they read about key questions in democratic government and current research trends students can practice serving as interest group activists and conduct original research on topics that most interest them
