Gorton, 2015-03-03 After the financial crisis of 2007 2008 analysts continue to question the security of banking sectors in nations in Europe Latin America Asia and Africa Why do such crises recur What is it about the accumulation of bank debt that potentially jeopardizes national and global banking systems There is no one better equipped to answer such questions than Gary Gorton who has been studying financial crises since his PhD thesis in 1983 The Maze of Banking contains a collection of his academic papers on the subjects of banks banking and financial crises The papers in this volume span almost 175 years of U S banking history from pre U S Civil War private bank notes issued during the U S Free Banking Era 1837 1863 followed by the U S National Banking Era 1863 1914 before there was a central bank through loan sales securitization and the financial crisis of 2007 2008 Banking changed profoundly during these 175 years yet it did not change in fundamental ways The forms of money changed resulting in associated changes in the information structure of the economy Bank debt evolved as an instrument for storing value smoothing consumption and transactions but its fundamental nature did not change In all its forms it is vulnerable to bank runs without government intervention Comprehensive and informative the collection is the definitive volume on the history of the U S banking system These papers provide the framework for understanding how the financial crisis of 2007 2008 developed and steps to promote a stable banking industry thereby preventing future economic crises The Maze of Banking is essential reading material for students and academics with an interest in economics finance and the history of banking Securitization Law and Practice Jan Job de Vries Robbé, 2008-01-01 Securitization once a fairly straightforward means of offering collateral for investment has mushroomed into a massively complex area of financial practice The central role occupied by such risk distributing products as collateral debt obligations CDOs credit default swaps CDSs collateral loan obligations CLOs and credit derivatives has given rise to one of the most crucial inquiries of our era Is the financial collapse that threatens the world financial system due merely to rogue traders Or is there something in the derivative idea itself that spells inevitable disaster Most important can we isolate the truly productive aspects of securitization and learn to recognise pitfalls in advance As always in such ideational minefields it is the legal practitioners who are expected to provide guidance to distressed investors and asset dealers Hence this vital new book Written from a distinctly practical point of view by Jan Job de Vries Robb with contributions from Paul Ali and Tim Coyne all three leading authorities with extensive experience as counsel both in house and in private practice in addition to

sterling academic credentials the book sheds clear light on every aspect of today's securitization techniques including welcome guidance on the following keeping track of exposure to the CDO market and evaluating such emerging asset classes as commodity risk microfinance and project finance risk In the course of the analysis the book proceeds from the relevant framework and guiding legal principles through key risks and building blocks in securitization transactions to the various product classes and sub classes and their differences and common denominators Non credit risk and niche products such as fund and insurance securitization are also covered The final chapters are devoted to the applicable rules as laid down in Basel II and International Financial Reporting Standards

Collective Securitization and Crisification of EU Policy Change Christian Kaunert, Sarah Léonard, 2022-08-22 This book represents the first attempt to evaluate the first two decades of the EU counterterrorism policy It aims to assess the collective securitization process in EU counterterrorism evaluating this as a process between a construction of security threats and the development of supranational governance through crisification Compared to the lack of shared perception of the terrorist threat and the virtual absence of counterterrorism cooperation amongst European states in the 1970s and 1980s the existence of EU wide debates legislative instruments and practical cooperation nowadays is particularly remarkable The chapters in this volume explore this change and seek to explain it by drawing upon the concept of collective securitization The book posits that EU counterterrorism needs to be analysed as a process driven by collective securitization as part of an ongoing process of crisification that leads to increased supranational governance The book is both extremely relevant and timely for readers outside the area of research for several reasons First of all EU counterterrorism is often argued to be at the forefront of the EU's response to new security threats The EU acquis on the Area of Freedom Security and Justice AFSJ has grown significantly over the last years Consequently it is crucial and very timely to examine EU counterterrorism exactly 20 years after the first significant measures were adopted in the wake of 9 11 The chapters in this book were originally published in the journal Global Affairs

True Sale Securitization in Germany and China Shengzhe Wang,2005-05-02

Inhaltsangabe Abstract The Master thesis for LL M at Goethe university s ILF titled True Sale Securitization in Germany and China is a comparative study about true sale securitization The initial reason for a comparative study was the similarity of banking centred financial systems in these two countries Another reason is connected with the True Sale Initiative TSI a plan composed by major German banks aiming at improving their financial situation German banks start to be plagued by the non performing loans NPLs since 2001 due to mediocre performance of German corporations and depreciation of banks investment to the east part during 1990s Facing the competitions from other countries and under pressures from the International Convergence of Capital Measurement and Capital Standards a Revised Framework Basel II issued by the Basel Committee on Banking and Supervisory Practice Basel Committee at the Bank for International Settlements the German
