Individuality and the Group Tom Postmes, Jolanda Jetten, 2006-06-12 Social identity research has transformed psychology and the social sciences Developed around intergroup relations perspectives on social identity have now been applied fruitfully to a diverse array of topics and domains including health organizations and management culture politics and group dynamics In many of these new areas the focus has been on groups but also very much on the autonomous individual This has been an exciting development and has prompted a rethinking of the relationship between personal identity and social identity the issue of individuality in the group This book brings together an international selection of prominent researchers at the forefront of this development They reflect on this issue of individuality in the group and on how thinking about social identity has

changed Together these chapters chart a key development in the field how social identity perspectives inform understanding of cohesion unity and collective action but also how they help us understand individuality agency autonomy disagreement and diversity within groups This text is valuable to advanced undergraduate and postgraduate students studying social psychology where intergroup relations and group processes are a central component Given its wider reach however it will also be of interest to those in cognate disciplines where social identity perspectives have application potential

The Cambridge Handbook of Material Culture Studies Lu Ann De Cunzo, Catharine Dann Roeber, 2022-06-09 Material culture studies is an interdisciplinary field that examines the relationships between people and their things the production history preservation and interpretation of objects It draws on theory and practice from disciplines in the social sciences and humanities such as anthropology archaeology history and museum studies Written by leading international scholars this Handbook provides a comprehensive view of developments methodologies and theories It is divided into five broad themes embracing both classic and emerging areas of research in the field Chapters outline transformative moments in material culture scholarship and present research from around the world focusing on multiple material and digital media that show the scope and breadth of this exciting field Written in an easy to read style it is essential reading for students researchers and professionals with an interest in material culture

Six Moments in Lacan Derek Hook, 2017-08-14 Many first time readers of Jacques Lacan come to his work via psychology a discipline that Lacan was notoriously antagonistic toward Six Moments in Lacan takes up the dual challenge of introducing Lacanian psychoanalysis to an audience interested in psychology while also stressing the fundamental differences between the two disciplines Punctuated by lively examples Six Moments in Lacan demonstrates the distinctive value of Lacanian concepts in approaching afresh topics such as communication identity otherness and inter subjectivity Avoiding the jargon and wilful obscurity that so often accompanies expositions of Lacan's psychoanalytic theories this book puts Lacanian ideas to work in practical and illuminating ways A handful of concepts drawn from distinct moments in Lacan's teaching are contextualized and explained and applied to the task of exploring the psychological and unconscious dimensions of everyday life Notions such as the big Other full versus empty speech logical time imaginary and symbolic identification and the idea of the master signifier are brought to life via popular cultural references Revitalizing several Freudian and Lacanian concepts for everyday use Six Moments in Lacan asks and answers a series of compelling questions Why is it that each instance of speech implies a listener Why is the notion of subjectivity inadequate when it comes to the trans subjective nature of language Is it possible to elaborate a non psychological theory of identification Why is a Lacanian approach to the subject so at odds with models proposed by psychology Six Moments in Lacan provides an accessible and highly engaging introduction to Lacan and Lacanian psychoanalysis aimed at early practitioners and students in psychoanalysis psychotherapy and those studying upper undergraduate and postgraduate level psychology

Human-Centered Built Environment Heritage Preservation Jeremy C. Wells,Barry L. Stiefel,2018-09-20 Human Centered Built Environment Heritage Preservation addresses the question of how a human centred conservation approach can and should change practice For the most part there are few answers to this question because professionals in the heritage conservation field do not use social science research methodologies to manage cultural landscapes assess historical significance and inform the treatment of building and landscape fabric With few exceptions only academic theorists have explored these topics while failing to offer specific usable guidance on how the social sciences can actually be used by heritage professionals In exploring the nature of a human centred heritage conservation practice we explicitly seek a middle ground between the academy and practice theory and application fabric and meanings conventional and civil experts and orthodox and heterodox ideas behind practice and research We do this by positioning this book in a transdisciplinary space between these dichotomies as a way to give voice and respect to multiple perspectives without losing sight of our goal that heritage conservation practice should fundamentally benefit all people We believe that this approach is essential for creating an emancipated built heritage conservation practice that must successfully engage very different ontological and epistemological perspectives

The New Global Insecurity Fathali M. Moghaddam,2010-01-22 A noted conflict expert shows how accelerating globalization is causing dangerous global insecurity that must be met by new security models and policies The New Global Insecurity How Terrorism Environmental Collapse Economic Inequalities and Resource Shortages Are Changing Our World explores insecurity arising out of accelerating globalization In this unique and forward thinking work psychologist Fathali M Moghaddam director of the Conflict Studies Program at Georgetown University explains how and why worldwide insecurity is rising and what steps we must take to quell or reverse that insecurity to make the future of the world more peaceful The book first analyzes the elements and roots of global insecurity discussing it in relation to terrorism torture economic instability threatened identity and religious fundamentalism It then puts forward a new model for understanding security wherein soft security capital serves as the enabling condition for hard security capital Finally the current policies for managing diversity multiculturalism and assimilation are both rejected in favor of an exciting new policy omniculturalism Drawing on his years of study and expertise Moghaddam likewise proposes a new policy for better managing intergroup relations in an insecure age

Understanding the Self and Others Gordon Sammut,Paul Daanen,Fathali M. Moghaddam,2013 How do we as human beings come to understand ourselves and others around us Bringing together a number of cutting edge researchers and practitioners in psychology and related fields this diverse collection of thirteen

papers draws on psychology sociology philosophy linguistics communications and anthropology to explore how human beings effectively come to understand and interact with others This volume is organised in three main sections to explore some of the key conceptual issues discuss the cognitive processes involved in intersubjectivity and interobjectivity and examine human relations at the level of collective processes

How Psychologists Failed Fathali M. Moghaddam, 2022-11-03 Psychologists must change direction by attending to the needs of disadvantaged minorities and adopting a correct model of science

Political Plasticity Fathali M. Moghaddam, 2023-01-05 Political plasticity refers to limitations on how fast how much and in what ways political behavior does or does not change In a number of important areas of behavior such as leader follower relations ethnicity religion and the rich poor divide there has been long term continuity of human behavior These continuities are little impacted by factors assumed to bring about change such as electronic technologies major wars globalization and revolutions In addition to such areas of low political plasticity areas of high political plasticity are considered For example women in education is discussed to illustrate how rapid societal change can be achieved This book explains the psychological and social mechanisms that limit political plasticity and shape the possibility of changes in both democratic and dictatorial countries Students teachers and anyone interested in political behavior and social psychology will benefit from this volume

A Guided Science Jaan Valsiner, 2017-07-05 That sciences are guided by explicit and implicit ties to their surrounding social world is not new Jaan Valsiner fills in the wide background of scholarship on the history of science the recent focus on social studies of sciences and the cultural and cognitive analyses of knowledge making The theoretical scheme that he uses to explain the phenomena of social guidance of science comes from his thinking about processes of development in general his theory of bounded indeterminacy and on the relations of human beings with their culturally organized environments Valsiner examines reasons for the slow and nonlinear progress of ideas in psychology as a science at the border of natural and social sciences Why is that intellectual progress occurs in different countries at different times Most responses are self serving blinders for presenting science as a given rather than understanding it as a deeply human experience For Valsiner scientific knowledge is cultural at its core Major changes have occurred in contemporary sciences collective authorship fragmentation of knowledge into small quickly published and equally quickly retractable journal articles and the counting of numbers of such articles by institutions as if that is a measure of scientific productivity Scientists are inherently ambivalent about the benefit of these changes for the actual development of knowledge There is a gradual takeover of the domain of scientific knowledge creation by other social institutions with vested interests in defending and promoting knowledge that serves their social interests Sciences are entering into a new form of social servitude

Shakespeare and the Experimental Psychologist Fathali M. Moghaddam, 2021-06-10 This book explores thought experiments in Shakespeare and shows how experimental psychology can be found in early modern English literature

Resistance in Everyday Life Nandita Chaudhary, Pernille

Hviid, Giuseppina Marsico, Jakob Waag Villadsen, 2017-07-10 This book is about resistance in everyday life illustrated through empirical contexts from different parts of the world Resistance is a widespread phenomenon in biological social and psychological domains of human cultural development Yet it is not well articulated in the academic literature and when it is resistance is most often considered counter productive Simple evaluations of resistance as positive or negative are avoided in this volume instead it is conceptualised as a vital process for human development and well being While resistance is usually treated as an extraordinary occurrence the focus here is on everyday resistance as an intentional process where new meaning constructions emerge in thinking feeling acting or simply living with others Resistance is thus conceived as a meaning making activity that operates at the intersection of personal and collective systems The contributors deal with strategies for handling dissent by individuals or groups specifically dissent through resistance Resistance can be a location of intense personal interpersonal and cultural negotiation and that is the primary reason for interest in this phenomenon Ordinary life events contain innumerable instances of agency and resistance This volume discusses their manifestations and it is therefore of interest for academics and researchers of cultural psychology cultural studies anthropology sociology and human development

From the Terrorists' Point of View Fathali M. Moghaddam, 2006-06-30 Presenting a picture of the world giving rise to Islamic terrorism *From the Terrorists Point of View* argues that terrorism arises from a deep and pervasive identity crisis in Islamic societies The account presented in these 10 chapters is shaped by the author's first hand experiences of life in the Islamic world as well as his more than quarter century of research on the psychology of conflict and radicalism Moghaddam shows us why individuals who are recruited into terrorist organizations are convinced it is the only viable alternative They believe there are no effective legal means of expressing their grievances and participating in decision making so they become socialized to see terrorist organizations as legitimate The organizations they join train them to adopt an us vs them categorical view seeing all members outside their group including civilians as among the evil enemy ranks Looking at the perspective of the terrorist groups themselves Moghaddam explains why current U S policy focusing almost exclusively on individual terrorists and their eradication will achieve only short term gains He argues that the more effective long term policy against terrorism is prevention That he writes requires cultivation and nourishment of contextualized democracy through culturally appropriate avenues Only allowing people a greater voice and creating mobility opportunities for them will ensure that they do not feel a need to climb the staircase to terrorism

Political Psychology Stanley A Renshon, John Duckitt, 2000-08 Military force transforms political institutions branches of government continually battle for power and position leaders rise and leaders fall but the key to the dynamics of these phenomena the psychology of our political leaders and that underlying most political processes remains one of the most understudied aspects of political life New political forces such as the trend toward globalization have resulted in an ever growing need to understand the relationship between psychology culture and politics

Promoting Conflict or Peace through Identity Nikki R.

Slocum-Bradley,2016-04-15 Developing a solid basis for future research and training this illuminating volume facilitates peace and mutual understanding between people by addressing a root cause of social conflicts identity constructions The volume encompasses eight revealing empirical case studies from regions throughout the world conducted by experts from diverse disciplinary backgrounds Each case study examines how identities are being constructed and used in the region how these identities are related to borders and in what ways identity constructions foment peace or conflict The volume summarizes insights gleaned from these studies and formulates an analytical framework for understanding the role of identity constructions in conflict or peace *Childbirth in the Global Village* Dawn Hillier,2013-10-14 Childbirth in the Global Village highlights and examines the role that globalisation plays in changing childbirth practices and to try to understand more clearly the interrelationship between globalisation modernization science the medical
