Br Zeolite Characterization and Catalysis Arthur W. Chester, E.G. Derouane, 2009-10-03 The idea for putting together a tutorial on zeolites came originally from my co editor Eric Derouane about 5 years ago I first met Eric in the mid 1980s when he spent 2 years working for Mobil R D at our then Corporate lab at Princeton NJ He was on the senior technical staff with projects in the synthesis and characterization of new materials At that time I managed a group at our Paulsboro lab that was responsible for catalyst characterization in support of our catalyst and process development efforts and also had a substantial group working on new material synthesis Hence our interests overlapped considerably and we met regularly After Eric moved back to Namur initially we maintained contact and in the 1990s we met a number of times in Europe on projects of joint interest It was after I retired from ExxonMobil in 2002 that we began to discuss the tutorial concept seriously Eric had semi retired and lived on the Algarve the southern coast of Portugal In January 2003 my wife and I spent 3 weeks outside of Lagos and I worked parts of most days with Eric on the proposed content of the book We decided on a comprehensive approach that ultimately amounted to some 20 chapters covering all of zeolite chemistry and catalysis and gave it the title Zeolite Chemistry and Catalysis An integrated Approach and Tutorial
