**Speech Restoration Via Voice Prostheses** I.F. Herrmann, 2012-12-06 This book contains a series of articles and summaries regarding surgical voice restoration after or during a total laryngectomy. Most readers will recall the pleasure patients feel when they are able to speak again after years of mute existence. A few simple questions are relevant to the articles contained herein. Firstly, how important is a person's voice? Is it for example as important to man as the dances bees use to convey essential information? Even the most superficial consideration must tell us that the function of the human voice is still more important as we already have a detailed body language of our own e.g. when we feel pain joy love fear etc. Without doubt speech is the basis of knowledge and surely it is the capacity to learn which characterizes the human intellect. Secondly, one may ask whether man was always intended to have a voice. A few every day observations can provide us with an answer. When little children play together for instance they all speak at once and seldom listen to what their neighbors are saying. Obviously this is because it is not so important what they are actually saying as that something is being said at all.

**Speech Restoration Via Voice Prostheses** I F Herrmann, 1986-09-01      **Surgery and Prosthetic Voice Restoration After Total and Subtotal Laryngectomy** Jésus Algaba, 1996 Hardbound Surgical and prosthetic voice restoration after total laryngectomy has been very controversial over the last few years and many specialists question its efficiency but there is no doubt that in the last 15-20 years the number of surgeons practising this type of surgical operation has increased rapidly and we now think that its efficiency is very evident. The number of prosthesis designs has increased due to greater usage. The results have been getting better and the number of sceptics has reduced. This volume covers recent advances in subtotal reconstructive surgery and its results have been presented as an alternative to total laryngectomy. Other interesting topics such as artificial larynx, laryngeal transplants or the laser in laryngeal carcinomas have been dealt with adequately. The congress has shown the importance, interest and acceptance of these surgical and prosthetic techniques for voice restoration.
