Holley made speed parts for 4 cylinder Model T engines and accomplished speeds of up to 100 mph In Vintage Speed Parts The Equipment That Fueled the Industry veteran hot rod historian Tony Thacker looks at the history of hot rodding through the eyes of speed equipment manufacturers Covered chronologically the book begins with the early 4 cylinder engines In 1932 Henry Ford introduced the flathead V 8 which was slow to be adopted as the engine of choice in racing until the parts industry caught up Once it did the flathead although interrupted by the war was the engine to run until the automobile manufacturers introduced overhead valve V 8 engines in the late 1940s Chrysler s early 1950s Hemi and Chevrolet s small block V 8 in 1955 spelled the end for the flathead Both mills dominated well into the 1970s and the speed industry was there to support all platforms in spades During that period every auto manufacturer made a V 8 worthy of modification and the speed industry boomed Eventually the speed equipment manufacturers grew to the point of becoming corporate entities as mergers and acquisitions became the much less interesting story Parts covered include special cylinder heads magnetos camshaft and valvetrain upgrades downdraft carburetors headers multiple carburetor setups and even superchargers Everyone figured out how to make engines more powerful upgrading with the type of parts that were being produced decades later even to today Join in the fun of reviewing the history of speed through this fascinating tale of vintage speed parts *The Chamber of Commerce Journal* ,1914 Summary of Supplemental Type Certificates ,1995 Ton Up!
