## **Ten Seconds From Now A Broadcasters Story:**

**Ten Seconds from Now** Godfrey Walker Talbot, 1973      **Broadcasting in the UK and US in the 1950s** Jamie Medhurst, Siân Nicholas, Thomas O'Malley, 2016-05-11 In an age of digital communications where radio satellite television and computing have come together to allow instant access to information and entertainment from around the globe it is sometimes easy to overstate the break with the recent past that these developments imply However from a historical perspective it is important to recognise that the national dimensions of communications including broadcasting have always been framed within different sets of international political economic cultural and technological relationships Television so easily seen as the last technology to succumb to the effects of internationalisation subsequent to the technical and political changes of the late twentieth century was in fact from the outset embedded in international interactions In recent years a focus has been placed on the longstanding sets of transnational relationships in place in the years after World War II when television established itself as the dominant form of mass communication in Europe and America Recent research has adopted a comparative approach to television history which has examined the interactions within Europe and between Europe and America from the 1950s onwards In addition there has been increasing interest in the idea of television in the Anglophone world looking at transatlantic interactions from the early phases of the development of the technology through the growing market for formats in the 1950s and outwards to connections with Australia and Hong Kong in these years The essays in this collection contribute to this area by bringing together in one volume work which focuses on both national developments in UK and US broadcasting in the 1950s to allow for reflection on how those systems were developing and being understood within those societies and raise issues about the ways in which the two systems interacted and can be usefully compared Some contributions deliberately focus on international issues while others embed the international dimension within them and still others offer a critical commentary on developments during the 1950s The book will appeal primarily to students and researchers in media and communication studies television studies radio studies and history but will also be of interest to all who have an interest in developments in communication in the post war period      **The History of Broadcasting in the United Kingdom: Volume V: Competition** Asa Briggs, 1995-03-23 Part of a five volume history of the rise and development of broadcasting in the United Kingdom      **Encyclopedia of Radio 3-Volume Set** Christopher H. Sterling, 2004-03 Produced in association with the Museum of Broadcast Communications in Chicago the Encyclopedia of Radio includes more than 600 entries covering major countries and regions of the world as well as specific programs and people networks and organizations regulation and policies audience research and radio s technology This encyclopedic work will be the first broadly conceived reference source on a medium that is now nearly eighty years old with essays that provide essential information on the subject as well as comment on the significance of the particular person organization or topic being examined      **Reporting from the Wars 1850 - 2015** Barry Turner, Daniel Barredo Ibáñez, Steven James

Grattan,2019-07-05 From the foundations of the world's first great empires to the empires of today war has preoccupied human civilisation for as many as 4000 years. It has fascinated, horrified, thrilled, confused, inspired and disgusted mankind since records began. Provoking such a huge range of emotions and reactions and fulfilling all the elements of newsworthiness, it is hardly surprising that war makes good news. Modern technological advancements such as the camera and television brought the brutality of war into the homes and daily lives of the public. No longer a far away and out of sight affair, the public's ability to see what was happening on the frontline changed not only how wars were fought but why they were fought. Even when a war is considered popular, the involvement of the press and the weight of public opinion has led to criticisms that have transformed modern warfare almost in equal measure to the changes brought about by weapon technology. War reporting seeks to look beyond the official story to understand the very nature of conflict whilst acknowledging that it is no longer simply good versus evil. This edited volume presents a unique insight into the work of the war correspondent and battlefield photographer from the earliest days of modern war reporting to the present. It reveals how influenced by the changing face of modern warfare, the work of the war correspondent has been significantly altered in style, method and practice. By combining historical analysis with experiences of modern day war reporting, this book provides an important contribution to the understanding of this complicated profession which will be of interest to journalists, academics and students alike.

**The BBC** David Hendy,2022-03-29 The first in depth history of the iconic radio and TV network that has shaped our past and present. Doctor Who, tennis from Wimbledon, the Beatles and the Stones, the coronation of Queen Elizabeth and the funeral of Diana, Princess of Wales. For one hundred years, the British Broadcasting Corporation has been the preeminent broadcaster in the UK and around the world, a constant source of information, comfort and entertainment through both war and peace, feast and famine. The BBC has broadcast to over two hundred countries and in more than forty languages. Its history is a broad cultural panorama of the twentieth century itself, often although not always delivered in a mellifluous Oxford accent. With special access to the BBC's archives, historian David Hendy presents a dazzling portrait of a unique institution whose cultural influence is greater than any other media organization. Mixing politics, espionage, the arts, social change and everyday life, The BBC is a vivid social history of the organization that has provided both background commentary and screen-grabbing headlines woven so deeply into the culture and politics of the past century that almost none of us has been left untouched by it.

Fields in Vision Garry Whannel,2005-07-19 Fields in Vision offers a comprehensive and analytical study of the international phenomenon of television sports coverage. Garry Whannel considers the historical development of sport on television, the growth of sponsorship and the way that television and sponsorship have reshaped sport in the context of the enterprise culture. Drawing on archival research, Whannel first charts the development of the BBC Outside Broadcast department and the growing battle for dominance between BBC and ITV, showing how sponsorship and the rising power of sports agents began to transform sport not only in the UK but across the world in the

1960s He goes on to examine the implications of this vast and escalating global network during the 1980s by analysing the central role that stars and narratives began to play in television sport presenting case studies of major contests such as Coe versus Ovett and Decker versus Budd His study also takes into account one of the more indirect but no less significant results of international televised sport the rise of popular fitness chic and the American monopoly of the workout boom of the 1980s Fields in Vision explains the development of television sport by linking its economic transformation with the cultural forms through which it is represented offering a study encompassing not simply the sports world but our relationship with television and the media industries as a whole

**Courtiers** Valentine Low, 2023-01-24 The gripping account of how the Royal family really operates from the journalist who has spent years studying them Who really runs the show and as Charles III begins his reign what will happen next Throughout history the British monarchy has relied on its courtiers the trusted advisers in the King or Queen s inner circle to ensure its survival as a family and a pillar of the country Today as ever a carefully selected team of people hidden from view steers the royal family s path between public duty and private life Queen Elizabeth II after a remarkable 70 years of service saw the final seasons of her reign without her husband Philip to guide her Now a newly ascended Charles seeks to define what his future as King and that of his court will be The question of who is entrusted to guide the royals has never been more vital Yet as the tensions within the family are exposed to global scrutiny like never before the task these courtiers face has never been more challenging With a dark cloud hanging over Prince Andrew as well as Harry and Meghan s controversial departure from royal life William and Kate equipped with a very 21st century approach to press and public relations now hold the responsibility of making an ancient institution relevant for the decades to come In fascinating and explosive detail Valentine Low explores the

previously unknown relationship between modern courtiers and the royal family Courtiers pulls back the veil to reveal an ever changing system of complex characters shifting alliances and a battle of ideas over what the future of the institution should be This is the inside story of how the monarchy really works at a pivotal moment in its history **BBC Handbook**
