The Future of U.S.-Korea-Japan Relations T'ae-hyo Kim,Brad Glosserman,2004 This book does not argue for stronger security ties among the three countries based solely on a shared understanding of the threats posed by North Korea Nor does it look toward containment of a rising China or resurgent Russia for its strategic rationale Rather the authors argue for broadening the foundation on which the three nations ties rest A better understanding of the complex weave of interests and values that binds the United States South Korea and Japan will stabilize the relationships and make them more resilient and adaptable to future developments

Global and Regional Problems Vilho Harle,2016-04-22 Distinctive due to explicit and systematically developed links between international relations IR and related disciplines this book addresses global and regional interactions and the complex policy problems that often characterise this agenda Such enhanced communication is crucial for improving the capacity of IR to engage with concrete issues that today are of high policy relevance for international organisations states diplomats mediators and humankind in

general Whilst the authors do not reject the present IR they offer a wider research agenda with new directions intended not only for those IR scholars who are unsatisfied with the analytical power of the current discipline but also for those working on international foreign global or interregional issues in other disciplines and fields of research In this instance they pay particular attention to linking up with peace research international political economy IPE and cultural political economy CPE sociology political geography development studies linguistics cultural studies environmental studies and energy research gender studies and traditions of area studies

Geopolitics at the End of the Twentieth Century Nurit Kliot, David Newman, 2013-11-05 An excellent examination of how the collapse of the Soviet Union and the impact of globalization have brought about changes not only to the territorial configuration sovereignty of states and their boundaries but also to traditional notions of state boundaries sovereignty and social order These essays focus on the key regional and geopolitical characteristics of this global reordering with an emphasis on Eastern Europe and South Asia They discuss the territorial reordering which is taking place at the level of the state as boundaries are redemarcated in line with ethno territorial demands as borders are transversed by the movement of peoples information and finance and as the lines of territorial demarcation are perceived not only in terms of their fixed characteristics but as part of a process through which regional and ethnic identities continue to be formed and reformed Each section ends with articles which focus on literature on geopolitics and boundaries This is an invaluable addition to our understanding of contemporary world affairs

Kazakhstan Hosted by President Kassym Jomart Tokayev this summit is set to be a vital gathering for the leaders of Azerbaijan Kyrgyzstan Turkmenistan Uzbekistan and observer states along with the Secretary General of the OTS The Summit was crowned with the central theme TURKTIME a visionary proclamation from the leaders to future generations This theme embodies a unified cooperative spirit and a collective determination to steer the Turkic World toward a trajectory of prosperity and comprehensive development The acronym TURKTIME encapsulates key principles that serve as the guiding framework of the Summit Traditions Unification Reforms Knowledge Trust Investments Mediation and Energy Each pillar of TURKTIME represents a fundamental commitment and strategic focus area Traditions Upholding and valuing the rich cultural and historical heritage of the Turkic nations Unification Fostering a sense of unity and solidarity among the Turkic States enhancing regional integration Reforms Advocating for progressive changes and modernization across various sectors to meet contemporary challenges Knowledge Promoting the exchange of knowledge information and best practices among member states Trust Building a foundation of trust both within and outside the Turkic community essential for effective collaboration Investments Encouraging investment flows within the region focusing on sustainable and mutually beneficial economic growth Mediation Engaging in constructive mediation to resolve conflicts thereby ensuring regional stability and peace Energy Intensifying cooperation in the energy sector recognizing its critical role in the economic vitality and security of the Turkic states This holistic roadmap anchored by the TURKTIME ethos charts a transformative course for the OTS It emphasizes the importance of unity cooperation and sustainable development as cornerstones for the future The Summit's strategic vision as encapsulated by TURKTIME aligns the collective efforts of the Turkic World towards achieving shared goals and facing global challenges with a united front While cooperation is gaining momentum in the Turkic region the global landscape simultaneously confronts multifaceted challenges Politically the rise of populist movements and shifts in global leadership dynamics have introduced new complexities Escalating regional conflicts and the proliferation of non state actors have amplified security concerns Economically the world faces uncertainty marked by fluctuating markets trade tensions and concerns over sustainable development Environmentally the escalating impacts of climate change biodiversity loss and resource depletion present critical challenges Furthermore the rapid advancement and integration of technology in every sphere poses opportunities and unprecedented challenges particularly in cybersecurity digital privacy and the ethical implications of artificial intelligence This intricate tapestry of political security economic environmental and technical issues encapsulates the multifaceted nature of contemporary global difficulties Besides resurgence of traditional security issues such as the return of power politics and the intensified global rivalry the world now faces unconventional threats such as food crisis health issues climate change global warming and illegal refugee problems The United States U S lost much of its constructive power and political will to act as an effective hegemon Neither the U S nor the challenging powers such as Russia respect the main principles of international law and decisions of global international organization such as the United

Nations UN Enforcement and respect for international law are critical challenges in current International Relations International law acts as a framework for global governance but its effectiveness largely depends on the willingness and power of states The U S and Russia as permanent members of the UN Security Council profoundly influence the interpretation and enforcement of international norms and laws However their actions often reveal a selective adherence to international legal obligations influenced by national interests and political objectives This selective adherence of states above brings to light the complexity of applying international law where balancing national interests and political agendas with international legal commitments becomes a delicate task A significant instance of this selective adherence is the U S exercise of its veto power at the UN Security Council obstructing a widely supported resolution for an immediate humanitarian ceasefire in Gaza This act is indicative of the U S s distinct role in international decision making which should ideally contribute to global welfare rather than represent a form of exceptionalism Against this backdrop the World is Bigger than Five discourse by President Recep Tayyip Erdo an becomes increasingly relevant calling for a more inclusive just and representative global decision making process for the UN Echoing UN Secretary General Antonio Guterres comments on the U S veto in the Security Council where he noted The delay comes at a cost the Security Council s authority and credibility were severely undermined and the resolution is not being implemented there is an urgent need for reform in the UN system Such reforms are vital to confront challenges like the U S veto power ensuring the UN s capacity to effectively prevent wars and maintain international peace and security At the end the world system has totally collapsed especially after the most recent violations of the system such as the invasion of Ukraine by the Russian Federation and the Israeli genocidal acts in the Gaza Strip against the innocent Palestinians While the Western states which are considered as the pro status quo powers fiercely opposed the Russian invasion of Ukraine they did not oppose the Israeli atrocities On the contrary Western countries particularly the U S have provided unconditional and limitless military political and economic support to Israel As mentioned earlier such selective adherence exacerbates the crisis on this matter Furthermore global international organizations such as the UN as Secretary General Guterres underlined fail to prevent regional and global conflict and to punish the states who violates basic human rights and commit war crimes In this chaotic and unstable world many middle power states have been trying to form regional coalitions to increase their deterrent powers and to establish balance of power against real or potential threats T rkiye as a regional power and a global actor has also been trying to form bilateral and multilateral regional coalitions with certain countries to maximize its national interests and also to increase its regional effectiveness Within this context the AK Party government under the leadership of President Erdo an has declared the establishment of a Turkish Axis at the beginning of the second century of the Turkish Republic When examined closely it can be easily inferred that there are two main groups of states that T rkiye can improve its relations to form the Turkish Axis namely Turkic and Muslim states T rkiye has accordingly tried to improve its relations with the Turkic states in the context of ongoing

geopolitical turbulence and shifts at the global and regional levels In alignment with its broader geopolitical strategy T rkiye has played a crucial role in shaping the OTS particularly since the 8th Turkic Summit which took place in Istanbul on November 12 2021 This influential role was further highlighted in the wake of T rkiye's significant support to Azerbaijan during the Second Karabakh War This involvement not only solidified T rkiye's relations with fellow Turkic states but also expanded its strategic and economic engagement in the Turkestan region Such developments are indicative of T rkiye's escalating influence within the Eurasian geopolitical sphere characterized by a harmonious blend of diplomatic economic and cultural cooperation under the auspices of the OTS framework T rkiye recognizes the strategic significance of its engagement with the Turkic states located in Central Asia and the Caucasus the regions that have long attracted the attention of global powers due to their abundant natural resources strategic location potential for economic development transportation logistics and connectivity T rkiye has consistently nurtured and progressively strengthened its relationships with fellow Turkic states since their independence As previously mentioned this bond was further reinforced by T rkiye's pivotal role in the Second Karabakh War highlighting its significant strategic influence in shaping the region's geopolitical landscape During this conflict Ankara played an instrumental role in facilitating the liberation of Azerbaijani territories and at the same time underscored T rkiye's strategic importance and bolstered its standing among these nations T rkiye's successful interventions in regional crises such as Libya and Syria also had a positive impact on its image In this context the Turkic states' decision to align with T rkiye can be seen as a strategic move to leverage T rkiye's increasing influence in regional geopolitics and global affairs This collaboration allows them to amplify their voice on the international stage enhancing their bargaining power and positioning in global geopolitics The alignment with T rkiye is not just about leveraging T rkiye's capabilities it's also about cultivating a unified front to address the complex dynamics of global challenges thereby fostering regional stability economic growth and cultural exchange among the Turkic states The establishment of OTS has increased expectations for the Turkic states to initiate a multidimensional and multi-level relations within the Turkic world Considering that many states want to become part of OTS as observer members it is clear that the organization will serve as the main locomotive of a possible regional integration of the Turkic world and make a great contribution to the institutionalization of cooperation among the Turkic states OTS has a great potential in political economic strategic and social dimensions within international and regional systems The Turkic nations who have a common language culture and religion are likely to collaborate economic and technical sectors such as in trade transport energy agriculture education and high tech ventures and tackle common challenges such as water resource management Furthermore the security and military dimension has become increasingly prominent within the multidimensional areas of cooperation among the Turkic states in recent years In conclusion the ascendance of the OTS in the Eurasian geopolitical landscape signals a transformative phase in the region's dynamics with the OTS poised to enhance economic and strategic connectivity between Europe and Asia This evolving role of

the OTS indicative of a new geopolitical order is significantly influenced by T rkiye s active participation and leadership T rkiye s role in the OTS has been instrumental in transitioning the organization from a platform for dialogue to a powerful union of states committed to trade enhancement economic cooperation and bolstering regional stability This pivotal role played by T rkiye leveraging its unique geographical and cultural position as a linchpin between Europe and Asia has been crucial in steering the OTS towards greater regional integration and a heightened global presence As mentioned above the 10th Summit of the OTS themed Turk Time encapsulates the essence of this transformation The acronym TURKTIME symbolizes the core principles guiding the Summit These principles reflect not only the Summit s focal areas but also the overarching goals and aspirations of the OTS with T rkiye s stewardship They highlight a commitment to preserving cultural heritage fostering unity driving meaningful reforms expanding knowledge building trust promoting strategic investments facilitating mediation in conflicts and prioritizing energy cooperation This thematic framework of TURKTIME not only shapes the discourse of the Summit but also mirrors the broader strategy of the OTS in its quest for a more interconnected and influential role on the global stage Thus the OTS with T rkiye s significant influence stands as a testament to the evolving nature of regional alliances and their capacity to shape international relations in the 21st century In its special issue highlighting the importance of the Turkic World Insight Turkey presents 4 commentaries and 4 research articles related to the subject Additionally it includes 4 off topic publications which touch upon the Palestinian issue focusing on the aftermath of October 7 operation and the role of energy in T rkiye Russia relations Our first commentary with the contributions of Farid Shafiyev begins by discussing the evolution of the OTS emphasizing its transformation from a consultative mechanism to a powerful international organization of geostrategic importance In his analysis Shafiyev highlights Azerbaijan s goal of promoting Turkic unity by examining significant events such as the Shusha Declaration the aftermath of the Second Karabakh War and the strategic alliance between Turkic states By focusing on current trends in regional and global politics that have given rise to the development of the OTS the author argues that it is imperative to strengthen and enhance cooperation among Turkic states and that the importance of Turkic unity in today s complex geopolitical landscape is only growing In the second commentary Yerkin Tukomov focuses on the relations between the Turkic World and Kazakhstan Tukomov argues that Kazakhstan is fully cognizant of the strategic importance of its relations with the OTS member states and is actively engaged in managing the complex balance between geopolitical challenges and opportunities In his commentary Tukomov endeavors to provide a comprehensive summary of Kazakhstan s short and medium term strategic priorities On the other hand Ferrukh Khakimov examines the current bilateral and multilateral relations between Uzbekistan and T rkiye in the context of ongoing geopolitical turmoil and changes at global and regional levels Khakimov argues that strengthening a comprehensive strategic partnership between Uzbekistan and T rkiye is vital to maintaining the geopolitical balance of power in the region and effectively addressing the common challenges of sustainable development Later the
