

TEORÍA MONETARIA MODERNA (MMT)

Es una **teoría económica**, elaborada en el siglo XIX, por Georg Friedrich Knapp.

Estudia economías modernas, en las que su moneda está basada en un **sistema fiduciario**.

Economías en las que el Estado cuenta con la **soberanía** para emitir su moneda.

Considera que, dada esa soberanía, el Estado **puede emitir** toda la moneda necesaria para afrontar los pagos que sean precisos.

The Monetary Theory of Production Augusto Graziani, 2003-09-04 In mainstream economic theory money functions as an instrument for the circulation of commodities or for keeping a stock of liquid wealth In neither case is it considered fundamental to the production of goods or the distribution of income Augusto Graziani challenges traditional theories of monetary production arguing that a modern economy based on credit cannot be understood without a focus on the administration of credit flows He argues that market asset configuration depends not upon consumer preferences and available technologies but on how money and credit are managed A strong exponent of the circulation theory of monetary production Graziani presents an original and perhaps controversial argument that will stimulate debate on the topic
