The Statistical Analysis of Recurrent Events Richard J. Cook, Jerald Lawless, 2007-07-16 This book presents models and statistical methods for the analysis of recurrent event data The authors provide broad detailed coverage of the major approaches to analysis while emphasizing the modeling assumptions that they are based on More general intensity based models are also considered as well as simpler models that focus on rate or mean functions Parametric nonparametric and semiparametric methodologies are all covered with procedures for estimation testing and model checking

Unfoldings Javier Esparza, Keijo Heljanko, 2008-03-12 In this book the authors introduce unfoldings an approach to model checking which alleviates the state explosion problem by means of concurrency theory They offer an introduction to the basics of the method and detail an unfolding based algorithm for model checking concurrent systems against properties specified as formulas of linear temporal logic LTL The book will be of value to researchers and graduate students engaged in automatic verification and concurrency theory

Conceptual Modeling - ER 2002 Stefano Spaccapietra, Salvatore March, Yahiko Kambayashi, 2003-06-30 For more than 20 years the series of Conceptual Modeling ER conferences has provided a forum for research communities and practitioners to present and change research results and practical experiences in the fields of database design and conceptual modeling Throughout the years the scope of these conferences has extended from database design and specific topics of that area to more universal or refined conceptual modeling organizing originally weak or ill structured information or knowledge in more cultured ways by applying various kinds of principles abstract models and theories for different purposes At the same time many technically oriented approaches have been developed which aim to facilitate the implementation of rather advanced conceptual models Conceptual modeling is based on the process of conceptualization and it is the core of system structuring as well as justification for information systems development It supports and facilitates the understanding explanation prediction and reasoning on information and knowledge and their manipulation in the systems in addition to understanding and designing the functions of the systems The conceptualization process aims at constructing concepts relevant for the knowledge and information system in question

Concepts in the human mind and concept descriptions in computerized information systems are quite different things by nature but both should be taken into account in conceptual modeling Usually concept descriptions are properly observed but concepts in the human mind and their properties are often neglected quite carelessly *Statistical Analysis of Panel Count Data* Jianguo Sun,Xingqiu Zhao,2013-10-09 Panel count data occur in studies that concern recurrent events or event history studies when study subjects are observed only at discrete time points By recurrent events we mean the event that can occur or happen multiple times or repeatedly Examples of recurrent events include disease infections hospitalizations in medical studies warranty claims of automobiles or system break downs in reliability studies In fact many other fields yield event history data too such as demographic studies economic studies and social sciences For the cases where the study subjects are observed continuously the resulting data are usually referred to as recurrent event data This book collects and unifies statistical models and methods that have been developed for analyzing panel count data It provides the first comprehensive coverage of the topic The main focus is on methodology but for the benefit of the reader the applications of the methods to real data are also discussed along with numerical calculations There exists a great deal of literature on the analysis of recurrent event data This book fills the void in the literature on the analysis of panel count data This book provides an up to date reference for scientists who are conducting research on the analysis of panel count data It will also be instructional for those who need to analyze panel count data to answer substantive research questions In addition it can be used as a text for a graduate course in statistics or biostatistics that assumes a basic knowledge of probability and statistics Secundum Naturam (According to Nature) Ron Hall,2020-04-09 Stoicism is a logical philosophy Herein one may learn to reason like a Stoic which leads to making progress toward living in accord with nature and from which an abiding happiness is produced Secundum Naturam is an exploration of Stoicism given the thesis that the philosophical doctrines derive from Stoic logic Itself Stoic logic derives from one first principle contradiction does not exist in nature although we contradict nature when we err The connectives modalities and argument resolutions are all defined with respect to contradiction as conflict between Both p and Not p And when your will contradicts nature you are living contrary to nature while the goal is to live secundum naturam according to nature Best of all learn how to improve yourself with Stoic logic according to reason according to nature only with Secundum Naturam **Issues in Bioengineering and Bioinformatics: 2011 Edition** ,2012-01-09 Issues in Bioengineering and Bioinformatics 2011 Edition is a ScholarlyEditions eBook that delivers timely authoritative and comprehensive information about Bioengineering and Bioinformatics The editors have built Issues in Bioengineering and Bioinformatics 2011 Edition on the vast information databases of ScholarlyNews You can expect the information about Bioengineering and Bioinformatics in this eBook to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Issues in Bioengineering and Bioinformatics 2011 Edition has been produced by the world s leading scientists engineers analysts research institutions and companies All of the content is

Reactive Internet Programming Franck Barbier, 2016-04-01 Is Internet software so different from ordinary software This book practically answers this question through the presentation of a software design method based on the State Chart XML W3C standard along with Java Web enterprise Internet of Things and Android applications in particular are seamlessly specified and implemented from executable models Internet software puts forward the idea of event driven or reactive programming as pointed out in Bon r et al s Reactive Manifesto <http://www.reactivemanifesto.org> It tells us that reactivity is a must However beyond concepts software engineers require effective means with which to put reactive programming into practice This book s purpose is to outline and explain such means The lack of professional examples in the literature that

illustrate how reactive software should be shaped can be quite frustrating Therefore this book helps to fill in that gap by providing in depth professional case studies that contain comprehensive details and meaningful alternatives Furthermore these case studies can be downloaded for further investigation Internet software requires higher adaptation at run time in particular After reading Reactive Internet Programming the reader therefore will be ready to enter the forthcoming Internet era

Cardiovascular Disease in the Elderly Franz H. Messerli, 2013-12-01 By the time a man gets well into his seventies his continued existence is a mere miracle Robert Louis Stevenson It hardly seems possible that a second edition is needed after the first has been in print for only three years However when I reflect on what has happened in geriatric cardiology during that short period it becomes obvious why First cardiologists all over the globe have begun to realize that geriatric cardiology has evolved into a science and a clinical discipline of its own Although some of us may consider such subspecialization unfortunate it has become clear that a variety of cardiac disorders present with different symptoms and signs require a different diagnostic and therapeutic approach and have a different prognostic outlook in the elderly when compared to middle aged patients Since the aging segment of the population has increased dramatically over the past few decades and continues to do so specific age related disorders are more frequently encountered by the practicing physician be it by the general practitioner by the internist or by a cardiologist Cardiovascular Disease in the Elderly provides an up to date guide to help the physician deal with these problems leading the way in what turns out to be an increasingly complex area Second I have been heartened by the warm reception of the first edition and by the excellent reviews that it got in the most prestigious medical journals
