**Human Frontiers, Environments and Disease** Anthony J. McMichael, 2001-06-28 A compelling account of the relentless trajectory of humankind across time and geography

**Leadership Accountability in a Globalizing World** C. Williams, 2006-05-02 Leadership accountability for violence corruption and environmental harm is a new aspect of globalization and civil society This innovative forward looking analysis explains how cumulative lock in fuels leadership deceit The lessons are for those learning to be or learning to question leaders

**Terminus Brain** Christopher Williams, 1997 Williams education U of Birmingham UK proposes that the extreme complexity of the threats to human intelligence posed by a polluted environment calls for the use of a collective term environmentally mediated intellectual decline or EMID He investigates the impact of EMID in terms of medical and social sciences ecology evolutionary theory ethics and legality He questions the current faith in risk assessment considers the possibility of regressive brain evolution and suggests changes in education and human behavior that might help to remedy the situation Distributed by Books International Paper edition 33856 7 24 95 Annotation copyrighted by Book News Inc Portland OR

**The Ingenuity Gap** Thomas Homer-Dixon, 2010-01-29 As crises multiply ingenuity lags This prescient classic explains why societies falter when problems outpace solutions and offers a roadmap to close the gap before risks from climate shocks pandemics inequality and AI spiral beyond control First published at the turn of the millennium The Ingenuity Gap by Thomas Homer Dixon anticipated the turbulent world we now inhabit pandemics climate disasters political polarization disruptive runaway technologies and escalating global instability With remarkable foresight Homer Dixon warned that the complexity of our problems would accelerate faster than our collective ingenuity to solve them and that failure to close this gap would leave societies fragile and exposed A quarter century later his vision has proven prophetic Homer Dixon takes readers on a global tour of ingenuity under pressure from the desperate improvisation of pilots fighting to land United Airlines Flight 232 in Iowa to the water hungry expansion of Las Vegas to a harrowing search for a missing child in Patna and the collapse of Canada's cod fisheries Vivid and far reaching it is a sweeping portrait of what happens when societies are stretched beyond their capacity to adapt and an enlightening case for why ingenuity is humanity's most vital resource Celebrating over twenty five years in print The Ingenuity Gap remains both a visionary diagnosis of our age and a call to reimagine how we generate creativity resilience and leadership in uncertain times

**Environmental Victims** Christopher Williams,2014-04-23 This study looks at environmental problems from the perspective of the victims The bottom line consequences are often damaging to the health of individuals or communities and they raise a wide range of issues concerning justice international and environmental law public health occupational health and health policy social policy and welfare international relations and security All of these issues are addressed by the contributors and the work is designed for a spectrum of readers whether concerned with industrial hazards and occupational health relevant agreements or treaties environmental refugees or the roles of state business and other actors

**Human Extinction** Émile P. Torres,2023-06-15 This volume traces the origins and evolution of the idea of human extinction from the ancient Presocratics through contemporary work on existential risks Many leading intellectuals agree that the risk of human extinction this century may be higher than at any point in our 300 000 year history as a species This book provides insight on the key questions that inform this discussion including when humans began to worry about their own extinction and how the debate has changed over time It establishes a new theoretical foundation for thinking about the ethics of our extinction arguing that extinction would be very bad under most circumstances although the outcome might be on balance good Throughout the book graphs tables and images further illustrate how human choices and attitudes about extinction have evolved in Western history In its thorough examination of humanity s past this book also provides a starting point for understanding our future Although accessible enough to be read by undergraduates Human Extinction contains new and thought provoking research that will benefit even established academic philosophers and historians

Researching Power, Elites and Leadership Christopher Williams,2012-05-18 This exciting new text consolidates the hows and whys of researching powerful people Written by a leading authority in the field this book introduces the reader to a significant area of methodology and provides a research based contribution to elite and leadership studies It offers a truly international perspective that will appeal to those studying and engaging with powerful people in a variety of contexts Useful features include A variety of case studies and examples linked to over 1000 sources and resources Extensive use of figures throughout the text to illustrate key points Templates and models for planning and presentations The book promotes a practical future oriented approach to support and inspire academic professional and civil society researchers at all levels It introduces new research frameworks and facilitates critical techniques through Critical Process Analysis This is a must have resource and an excellent new addition to the field of elite and leadership studies

**Comparative and Global Pedagogies** Joseph Zajda,Lynn Davies,Suzanne Majhanovich,2008-06-26 A major aim of Comparative and Global Pedagogies Equity Access and Democracy in Education which is the second volume in the 12 volume book series Globalisation Comparative Education and Policy Research edited by Joseph Zajda and his team is to present a global overview of recent trends in equity and access in

education globally By examining some of the major education policy issues particularly in the light of recent shifts in education and policy research dealing with equity and access the editors aim to provide a comprehensive picture of the intersecting and diverse discourses of globalization education and policy driven reforms The impact of globalization on education policy and reforms is a strategically important issue for us all More than ever before there is a need to understand and analyse both the intended and the unintended effects of globalization on educational systems the state and relevant policy changes especially in terms of equity and access as they affect individuals educational bodies such as universities policy makers across the globe Current education policy research dealing with equity and social inequality reflects a rapidly changing world where citizens and consumers are experiencing a growing sense of uncertainty exclusion and loss of flexibility Yet globalization exposes us also to opportunities generated by a fast changing world economy

*In Search of Human Nature* Mary E. Clark, 2005-08-18 In this magisterial new work biologist Mary Clark argues that the Western view of human nature is built around highly atomistic and ideological framework that encourages us to think about the world and ourselves in the wrong way

**Doing International Research** Christopher Williams, 2015-05-15 This energetic and thought provoking book encourages a reflexive non nationalistic approach to doing world research and sets out how to understand plan do and use this research Williams introduces a range of frameworks from desk based studies and traditional ethnography to the use of internet satellites robots drones and big data and provides exciting interdisciplinary examples This book is presented in a clear international style and uses creative approaches to researching peoples places and world systems It explains desk based research using international data including documentaries museum objects archives data sets and working with groups such as refugees tourists and migrants distance research using online videos surveys and remote methods such as video conferencing and crowdsourcing fieldwork abroad including ethnography street observation and mapping The book is also accompanied by a website with the following features For Students Weblinks for each chapter Examples summaries templates related to text marked with Additional thinking zones An overview of data capture technologies For Lecturers Copies of all the figures and thinking zones for use in teaching material PowerPoint slides for each chapter Built upon the foundations of the author's 30 years of research experience and including original case studies from international students this is an essential guide for anyone in the social sciences using or doing international and global research

*Beyond Ukraine* Tim Sweijts, Jeffrey H. Michaels, 2024-05-01 Russia's large scale invasion of Ukraine has sparked a major shift in thinking about the future of war This book offers a comprehensive examination of its impact on visions of conflict

**Intellectual Disability and Ill Health** Jean O'Hara, Jane McCarthy, Nick Bouras, 2010-01-21 People with intellectual disability often have health needs that go unrecognised and untreated this may be because of difficulties in communication diagnostic overshadowing discrimination or indifference There is concern that public health measures aimed at reducing the main health killers in the population will not address these issues for people with intellectual disability and

may preferentially widen the inequality that already exists This book is a comprehensive and systematic review of physical and mental health co morbidities in people with intellectual disability Such an evidence base is vital in shaping public health policy healthcare commissioning and the development of more effective healthcare systems as well as supporting better understanding and practice at an individual clinical level This is essential reading for policy makers and commissioners of services as well as individual practitioners across mainstream and specialist health and social care in considering not only service developments but practice at the coalface

*Hungry Corporations* Helena Paul,Ricarda Steinbrecher,2003 Hungry Corporations offers a detailed account of how huge agrochemical corporations have come to control the food chain exposing their influence over governments regulatory bodies and university research

Environments and Livelihoods Koos Neefjes,2000 This book is intended to be used to support the campaigning and lobbying work of local and international development organizations to improve the formulation and implementation of development strategies and to strengthen participatory project planning monitoring and impact assessment in poverty and environmental change

**Inventions of Teaching** Brent Davis,2004-04-12 Inventions of Teaching A Genealogy is a powerful examination of current metaphors for and synonyms of teaching It offers an account of the varied and conflicting influences and conceptual commitments that have contributed to contemporary vocabularies and that are in some ways maintained by those vocabularies in spite of inconsistencies and incompatibilities among popular terms The concern that frames the book is how speakers of English invented in the original sense of the word came upon our current vocabularies for teaching Conceptually this book is unique in the educational literature As a whole it presents an overview of the major underlying philosophical and ideological concepts and traditions related to knowledge learning and teaching in the Western world concisely introducing readers to the central historical and contemporary discourses that shape current discussions and beliefs in the field Because the organization of historical philosophical theoretical and etymological information is around key conceptual divergences in Western thought rather than any sort of chronology this text is not a linear history but several histories or more precisely it is a genealogy Specifically it is developed around breaks in opinion that gave or are giving rise to diverse interpretations of knowledge learning and teaching highlighting historical moments in which vibrant new figurative understandings of teaching emerged and moments at which they froze into literalness The book is composed of two sorts of chapters branching and teaching Branching chapters include an opening treatment of the break in opinion separate discussions of each branch and a summary of the common assumptions and shared histories of the two branches Teaching chapters offer brief etymological histories and some of the practical implications of the terms for teaching that were coined co opted or redefined within the various traditions Inventions of Teaching A Genealogy is an essential text for senior undergraduate and graduate courses in curriculum studies and foundations of teaching and is highly relevant as well for students faculty and researchers across the field of education

**Genetic Governance** Robin Bunton,Alan Petersen,2005-03-18 Ethical and practical issues around

genetic research are of major international concern both in academia and in the public domain Questions concerning what interventions are possible and appropriate with the increasing amount of genetic information available challenge our understandings of ourselves our health and wellbeing and the role of medical ethics public health surveillance and risk However there has been little reflection on the socio political effects of this new genetic knowledge and the changes in practice that are currently impacting on our lives Containing contributions from key international researchers this book examines the broader issues of genetic debates and looks at how prediction and risk assessment is being changed in the arenas of health medicine and reproduction bringing new insight on the dangers of surveillance regulation and increased inequality Developed out of the Taylor and Francis journal Critical Public Health the book considers the implications of developments in genetics for contemporary liberal governance as well as for the future of healthcare and public health
