Childhood in the Roman World Maureen Carroll,2018-03-01 Despite the developing emphasis in current scholarship on children in Roman culture there has been relatively little research to date on the role and significance of the youngest children within the family and in society This volume singles out this youngest age group the under one year olds in the first comprehensive study of infancy and earliest childhood to encompass the Roman Empire as a whole integrating social and cultural history with archaeological evidence funerary remains material culture and the iconography of infancy it explores how the very particular historical circumstances into which Roman children were born affected their lives as well as prevailing attitudes towards them Examination of these varied strands of evidence drawn from throughout the Roman world from the fourth century BC to the third century AD allows the rhetoric about earliest childhood in Roman texts to be more broadly contextualized and reveals the socio cultural developments that took place in parent child relationships over this period Presenting a fresh perspective on archaeological and historical debates the volume refutes the notion that high infant mortality conditioned Roman parents not to engage in the early life of their children or to view them or their deaths with indifference and concludes that even within the first weeks and months of life Roman children were invested with social and

gendered identities and were perceived as having both personhood and value within society Education in Early 2nd Millennium BC Babylonia Alexandra Kleinerman, 2011-08-25 This book examines a collection of twenty two literary letters and related compositions the Sumerian Epistolary Miscellany SEpM studied as part of the Old Babylonian Sumerian scribal curriculum in an attempt to better understand the education system at this time The author includes discussion of the nature of the letters as scribal inventions the pedagogical function of literary letters and compilation tablets as well as the creation implementation and consistency of the advanced Sumerian scribal curriculum The volume also contains critical editions of SEpM as well as ancillary Sumerian letters studied in the Nippur schools the majority of which were previously unpublished
