Connected Mathematics Mathematics in Context MathScape and MathThematics most of the lessons learned from this work are not curriculum specific Rather they cut across the four programs and share commonalities with standards based curriculum reform at any level We believe that documenting these lessons learned will be one of the legacies of the Show Me Project We anticipate that the comprehensive nature of this work will attract readers from multiple audiences that include state and district mathematics supervisors middle grades mathematics teachers and administrators involved in curriculum reform as well as mathematics teacher educators Those about to embark on the review of curriculum materials will appreciate reading about the processes employed by other districts Readers with interests in a particular curriculum program will be able to trace the curriculum specific chapters to gain insights into how the design of the curricula relate to professional development adoption and implementation issues and teachers personal experience using the curriculum materials Individuals who provide professional development at the middle grades level will find chapters that they can use for both general and focused discussions Teachers at all stages of implementation will recognize their own experiences in reading and reflecting on the stories of teacher change Mathematics educators will find ideas on how these curricula can be used in the preparation of preservice middle grades teachers
