The Skyscraper Curse Mark Thornton, 2018-08-01 The Skyscraper Curse is Dr Mark Thornton's definitive work on booms and busts and it explains why only Austrian economists really understand them It makes business cycle theory accessible to a whole new 21st century audience And they need it especially those under 40 Many of the brilliant quants working on Wall Street and at the Fed barely remember the Crash of 2008 much less understand it But Mark Thornton does and his book is a warning about overheated equity markets over inflated housing prices and clueless central bankers Given the shaky stock markets lately 2018 may be the year the Fed's latest bubble bursts And when it does it will be even more painful than 10 years ago In fact US household and business debt is now one trillion dollars higher than 2008 Mark is well known as an expert on bubbles and Fed malfeasance His work appears in outlets like Wall Street Journal Bloomberg Forbes The Economist Barron's and Investor's Business Daily His now infamous Skyscraper Index theory draws the connection between loose monetary policy artificially low interest rates and vanity construction projects Put the three together and it doesn't turn out well And let's not forget that Dr Thornton was among only a handful of economists to warn about the dangerous housing bubble in 2004 and again in 2006 Cabbies and waiters bought up condos with no money down in places like Las Vegas Prices rose 25 percent or more every year in some coastal markets Even people with terrible credit financed houses at five or seven times their annual income All of it was made possible by the Fed and its mania for low interest rates So when the experts said Nobody could have seen this coming the Mises Institute had Mark's articles and papers ready to go The housing crash and the meltdown in equity markets less than a year later were thoroughly explained by Austrian business cycle theory And Mark was the capable face of the Mises Institute during it all Without a lay friendly book like *The Skyscraper Curse* millions more Americans will be duped by the next crash Dr Thornton's book tells the story that needs to be told It will be among the only alternative explanations available when the next crisis comes *Engineering Marvels: Stand-Out Skyscrapers: Area* Stacy Monsman, 2024-02-13 Have you ever seen a skyscraper that is shaped like an elephant How about one that looks like waves Students will learn how to measure area while engaged in reading about the
