## **Special Needs Provision Rethinking Special Needs Education:**

**Rethinking Special Needs in Mainstream Schools** Alan Dyson, Charles Gains, 2018-09-03 First published in 1993 This book critically analyses the state of provision for special needs exploring the problems faced by practitioners and suggesting that the area is fraught with such tensions that a radical reconceptualization is necessary It considers how the field may be rethought and developed over the next decade and presents examples of innovatory practice which point the way forward to future provision and which are illustrative of the themes raised throughout the book *Must Inclusion be Special?* Jonathan Rix, 2015-06-05 *Must Inclusion be Special* examines the discord between special and inclusive education and why this discord can only be resolved when wider inequalities within mainstream education are confronted It calls for a shift in our approach to provision from seeing it as a conglomeration of individualised needs to identifying it as a conglomeration of collective needs The author examines the political medical and cultural tendency of current times to focus upon the individual and contrasts this with the necessity to focus on context This book distinguishes the theoretical perspectives that are often associated with special or inclusive education and the broad range of interests which depend upon their ongoing development This examination leads to a problematisation of mainstream education provision our understanding of why social inequities emerge and how additional support can overcome these inequities Further chapters explore the underlying challenges which emerge from our use and understanding of the notions of special and inclusive outlining an alternative approach based upon a community of provision This approach recognises the interconnectedness of services and the significance of context and it encapsulates the aspiration of much international legislation for participation and inclusion for all But it also assumes that we tend towards diffuse practices services policies settings and roles spread across provision which is variously inclusive and exclusionary In seeking to create equitable participation for all support needs to shift its focus from the individual to this diffuse network of contexts *Must Inclusion be Special* emerges from the research base which problematises inclusion and special education drawing upon examples from many countries It also refers to the author's research into pedagogy language and policy and his experiences as a teacher and the parent of a child identified with special educational needs **Special Education in Britain after Warnock** John Visser, Graham Upton, 2018-09-03 First published in 1988 With the Education Reform Act 1988 firmly in place and impacting upon the education of children and young people with Special Educational Needs this book examines the issues that arose from its implementation It aims to promote debate as well as providing a record of the achievements in practice policy and provision in Britain since the Warnock Committee reported The challenges which remain or have been created since the introduction of the Education Act 1981 are also discussed **Routledge Library Editions: Special Educational Needs** Various, 2021-07-29 This set of 62 volumes originally published between 1951 and 1999 amalgamates a wide breadth of literature on Special Educational Needs with a particular focus on inclusivity class management and curriculum theory This collection of books from some of the leading

making educational institutions inclusive responsive to the diversity of all their students us In this unique comparative study the editors have brought together an international team of researchers from eight countries to develop case studies which explore the processes of inclusion and exclusion within a school or group of schools set in its local and national context The study includes classroom observation the experiences of the school day of students and interviews with staff students parents and school governors Through an innovative juxtaposition of the case studies and commentaries on them differences of perspective within and between countries are revealed and analysed The study arose from a dissatisfaction with previous research which presents national perspectives or seeks findings that have global significance This book avoids such simplification and draws attention to the problems of translation of practice across cultures The editors start from an assumption of diversity of perspective which like the diversity of students within schools can be viewed as problematic or as a resource to be recognized and celebrated
