example you are given 30 seconds to prepare How you use this 30 seconds is key to effective sight reading DON T just start playing from the beginning Rather the first thing you should do is get a sense of the key you are in and if you are taking an early Grade 1 2 simply find the hand position for each hand before playing a note Throughout this course you will also find some Instant Hand Position or Key Signature Recognition tests Then concentrating on the rhythm try and visualize in your head how the music should sound again before you even play a note This will also include other stylistic markings such as dynamics and articulation Getting the right pitch is only a small part of what the examiner is looking for Below each test in this course there will be hints of details to look out for before you even play a note The last thing mentioned in the marking criteria for a distinction is Confident presentation A sight reading test is an assessment on how well you can convey the music as a whole performance NOT if you can recognise the pitches A B C etc that is a theory exam Finally a word on mistakes If you do miss a note DON T go back and correct it you ll only upset the flow and rhythm of the music and this effectively then counts as a 2nd mistake You can t erase the first mistake and the examiner is not interested if you can improve on your wrong note he wants to hear a performance of the music as a whole which conveys as best you can the character of the piece
