Speech Language pathologists have long been involved in providing services to children with communication disorders in the schools. However, a number of recent events have altered the practice environment, including changes in national and state legislation, shifting demographics, an increase in the severity of disorders encountered, advances in technology, and a move toward curriculum-based assessment. The new edition of *Speech Language and Hearing Programs in Schools: A Guide for Students and Practitioners* reflects these events. The new editors and contributors to the first edition have substantially updated and revised all chapters and have added new material on the reauthorization of IDEA, literacy acquisition, pediatric dysphagia, children from culturally diverse backgrounds who are increasingly represented in speech language pathology caseloads, and much more. The book also includes chapter objectives, case studies, and Internet resources and is supplemented by an instructor's manual.

*The Practitioner's Path in Speech Language Pathology: The Art of School-Based Practice* bridges the gap between theory and practice, evidence-based practice and practice-based evidence, and the science and artistry of speech language pathology. This book takes a critical look at areas related to wellness, professional development, and growth that can impact the personal self along with the professional self. It examines each area through an overview of interdisciplinary research, in addition to personal narratives illustrating key principles and strategies, and offers the reader a professionally balanced perspective. The first section of the book helps us understand the importance of building a foundation for our clinical path through a discussion about scientific and evidence-based principles, different types of knowledge systems, and development of wisdom. The second section of the book helps us understand the importance of supporting our foundation through an introduction to reflection, counsel, and care balance and harmony, growth, and detachment. The third section of the book includes chapters that serve as pillars of practice: organizational frameworks, materials and activities, measuring progress, best practices, and the importance of community. The fourth and final section of the book highlights shared vision, clinical expertise, emotional intelligence, leadership, trends in the scholarship of teaching and learning, and research dissemination. This book challenges us to consider our own perceptions about the explicit nature of professional practice and facilitates the development of four attitudes that can have a profound impact on both clinical success and professional satisfaction: a scientific attitude, a therapeutic attitude, a professional attitude, and a leadership attitude. It contains a blend of clinical evidence and research, practitioner views, common sense, philosophical stances, and historical overviews. *The Practitioner's Path in Speech Language Pathology* is designed for students and practitioners who are actively involved with the process of knowledge acquisition and

targets issues we encounter along our path to becoming reflective practitioners as they relate to the excellence behind and scholarship within teaching and learning
