As eye tracking systems become available at reasonable prices, the effect of gaze control and visual perception on sport-related motor performance becomes more relevant in both research and professional contexts. Focused on evidenced-based theoretical and practical applications of gaze strategies related to expert performance in sport, this cutting-edge edited book brings together the multi-faceted implementation of gaze behavior and visual attention in sport from both the empirical and applied perspectives. This state-of-the-art summary of the evidence-based as well as knowledge through to applied practice will be key reading for all elite athletes as well as elite sport psychology consultants, coaches, and instructors.
