Authenticity and Wooden Architecture Preservation in Asia - a Chinese perspective Tomasz Tomaszek, 2022-11-11 The tradition of Chinese wooden architecture dates back to ancient times The construction solutions developed in this country over the centuries enchant with their refined character while the historical wooden structures delight future generations with their dignity and aesthetic excellence China's wooden architecture deeply rooted in its spiritual and religious traditions is undoubtedly the pinnacle of this type of building in Asian culture At the same time it is a testimony to the national identity and reflects the specificity of the country's material heritage The accelerated social and economic changes in China and the constantly advancing globalization of the world have contributed to this country's assimilation of Western concepts related to the protection of cultural heritage The issue of authenticity in the preservation of wooden built heritage proved particularly problematic This book brings closer the theoretical understanding and practical application of the idea of authenticity from Chinese perspective To do this the issue of living heritage and the reception and understanding of traditional Chinese wooden architecture and its preservation as a direct materialization of Chinese religious and philosophical traditions is discussed The above topics are treated within the cyclic concept of time i.e. in terms of progress and repetition with preservation being understood as a religious practice Finally trends in the preservation of wooden heritage in present day China are mentioned including new attempts to interpret the tradition and the reinvention of the tradition of wooden building The book aims to contribute to the understanding of the protection of wooden architectural heritage in China from a new perspective and will be of particular interest to academics and professionals interested in or involved in the preservation of built wooden heritage a highly valuable contribution to the field of wooden architecture protection and preservation Xiaoming Zhu Tongji University Shanghai China This book successfully explains the inheritance characteristics of Chinese wooden architectures from the perspective of cultural philosophy for a wide audience Yasufumi Uekita University of Tsukuba Ibaraki Japan

both natural and supernatural came to be worshipped as gods of world renewal These included disgruntled peasants who demanded their local governments repeal unfair taxation government bureaucrats who implemented special fiscal measures to help the poor and a giant subterranean catfish believed to cause earthquakes to punish the hoarding rich In the modern period yonaoshi gods took on more explicitly anti authoritarian characteristics During a major uprising in Saitama Prefecture in 1884 a yonaoshi god was invoked to deny the legitimacy of the Meiji regime and in the late nineteenth and early twentieth centuries the new religion moto predicted an apocalyptic end of the world presided over by a messianic yonaoshi god Using a variety of local documents to analyze the veneration of yonaoshi gods Takashi Miura looks beyond the traditional modality of research focused on religious professionals their institutions and their texts to illuminate the complexity of a lived religion as practiced in communities He also problematizes the association frequently drawn between the concept of yonaoshi and millenarianism demonstrating that yonaoshi gods served as divine rectifiers of specific economic injustices and only later in the modern period and within the context of new religions such as moto were fully millenarian interpretations developed The scope of world renewal in other words changed over time Agents of World Renewal approaches Japanese religion through the new analytical lens of yonaoshi gods and highlights the necessity of looking beyond the boundary often posited between the early modern and modern periods when researching religious discourses and concepts Illustrated Catalogue of
