### **Temporal Lobe Epilepsy 1948 1986 A Biographical Study Clinics In developmental Medicine No 103:**

Temporal Lobe Epilepsy Christopher Ounsted, Janet Lindsay, Peronelle Richards, 1987 Temporal Lobe Epilepsy 1948 to 1986 is a prospective study in biographical medicine The four decades covered have yielded several revolutions in the understanding of brain development both normal and abnormal These are described in their biographical context The book is based on a comprehensive study of one hundred children with temporal lobe epilepsy all of whom were followed to adulthood A separate study was made of eighty two patients treated by neurosurgery The authors employ a novel and revolutionary approach that emphasizes the relevance of the disease and its associated problems to each person's life history Flow charts are used to illustrate critical developmental factors The work is a paradigm of the practice of medicine and surgery as part of human biological science It provides lessons of direct relevance to all clinicians involved in the treatment of patients with epilepsy

Outcomes in Neurodevelopmental and Genetic Disorders Patricia Howlin, Orlee Udwin, 2002-07-25 Edited by two leading authorities and written by a team of international experts in the field this book describes the causes course and treatment of a variety of developmental and genetic disorders including attention deficit disorder fragile X syndrome and the autistic spectrum disorders There is a particular focus on the course of disorders over time and outcome in adulthood Outcome is an area often overlooked in other books about developmental disorders but is an issue of great importance to parents and carers and one that has important implications for education health social and employment services As well as providing succinct and up to date summaries of the most recent research the authors give clinicians practical guidelines for intervention and management with children and young adults This book is essential reading for clinicians and psychologists and anyone working with or caring for children with special educational needs

**National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1989 **The Health and Social Needs of Young Adults with Physical Disabilities** Andrew Thomas, Martin Bax, Diane Smyth, 1989 This book addresses a topic that has received surprisingly little attention to date the health and social needs of young adults with physical disabilities Following an extensive review of the contemporary literature on the subject the authors report an in depth study on a large sample of physically disabled 18 to 25 year olds living in two survey areas one urban and one semirural The study which included pediatric examinations and interviews by a social psychologist found that a large proportion of subjects face social and medical problems for instance They have serious health needs that are not being met by the statutory services they left school with less than adequate skills to enable them to lead an independent adult life they are without a daytime occupation or attend day centers that are described as unstimulating places they do not receive all the financial benefits to which they are entitled they are isolated from their peers and lack the social skills to interact with others in a positive and successful way Parents and guardians were also found to receive little physical or emotional support These findings underline the need for a better system of providing and coordinating services for this client group and the authors call for the formation within each local health authority area

of an Adult Disability Service that would have a clinical and planning role in terms of health care and that would act as a linchpin in the coordination of health educational social and voluntary services Although this work relates specifically to service provision in the United Kingdom it is felt that the conclusions and recommendations are also broadly applicable to the situation in other countries

**Biological Risk Factors for Psychosocial Disorders** European Network on Longitudinal Studies on Individual Development,1991-11-29 It has been known for many years that physical disease or damage especially of the brain is associated with an increased risk for psychosocial disorders However the understanding of the mechanisms involved in these biological risk processes and of the marked individual differences in response is of much more recent origin The role of genetic factors perinatal brain damage sex hormones allergy drugs and language disorder are among the topics reviewed by this book s expert contributors Papers were selected to illustrate the wide range of mechanisms involved in the development of psychosocial disorders in childhood or later life Authors were asked to write for a multidisciplinary audience to adopt a lifespan approach to focus on the principles involved and to highlight the outstanding research and clinical issues in each field

**Current Catalog** ,1989 First multi year cumulation covers six years 1965 70 Congenital Hemiplegia Brian Neville,Robert Goodman,2000-01-18 Clinics in Developmental Medicine No 150 This is a comprehensive review of congenital hemiplegia for the clinician covering all aspects from etiology and pathology to clinical assessment and management whether orthopaedic neurological or psychological The team of expert international contributors highlight the many quite distinct problems of hemiplegia and review all the current approaches Probable future developments are also described especially unilateral hemisphere lesions a topic currently of great interest to basic science researchers

**Epilepsies of Childhood** Niall V. O'Donohoe,1994 The original framework of the book has been retained and its intention remains unchanged that is to attempt to give a coherent chronological and understanding account of epilepsy as it affects children from early infancy through to adolescence Rutter's Child and Adolescent Psychiatry Sir Michael J. Rutter,Dorothy Bishop,Daniel S. Pine,Stephen Scott,Jim S. Stevenson,Eric A. Taylor,Anita Thapar,2011-08-24 Rutter s Child and Adolescent Psychiatry has become an established and accepted textbook of child psychiatry Now completely revised and updated the fifth edition provides a coherent appraisal of the current state of the field to help trainee and practising clinicians in their daily work It is distinctive in being both interdisciplinary and international in its integration of science and clinical practice and in its practical discussion of how researchers and practitioners need to think about conflicting or uncertain findings This new edition now offers an entirely new section on conceptual approaches and several new chapters including neurochemistry and basic pharmacology brain imaging health economics psychopathology in refugees and asylum seekers bipolar disorder attachment disorders statistical methods for clinicians This leading textbook provides an accurate and comprehensive account of current knowledge through the integration of empirical findings with clinical experience and practice and is essential reading for professionals working in the field of child and adolescent mental health and clinicians

working in general practice and community pediatric settings      **The Spastic Forms of Cerebral Palsy** Adriano Ferrari, Giovanni Cioni, 2009-12-29 by A Berthoz The publication of this volume edited by Adriano Ferrari and Giovanni Cioni is a major event for several reasons Most importantly it concerns an area of child pathology that has yet to be fully explored In this context the authors efforts to compile their observations as well as those of other clinicians and to elaborate their theories have resulted in an essential step in the field of cerebral palsy CP The originality of the book is its very clear focus while at the same time the authors have encouraged the book's contributors to express their ideas and personal opinions This leads sometimes to redundancy but this is precisely one of the benefits of the book cause the same problems are then exposed from different points of views The reader is thus spared the normative attempts of many other pathology books in which the complexity of a given disease is hidden by the authors or editors desire to impose a rigid taxonomy or epidemiology

*Fits and Faints* J. B. P. Stephenson, 1990 This book is concerned with one of the major areas of misdiagnosis in medicine today It has been estimated that as many as thirty percent of children typed as epileptic when presenting with loss of consciousness falls or other paroxysmal episodes have in fact non epileptic attacks Yet because of the stigma attached to this label and the frequent side effects of anti epileptic drugs it is important that the alternative etiological mechanisms be recognized The most common of these conditions the vagalmediated anoxic seizure or fainting fit is so frequent that it will be encountered by anyone involved in the practice of clinical medicine in its widest sense These seizures are discussed in depth using original data and extensively reviewing the literature Many other less common but nonetheless important varieties of fits faints and funny turns are self induced by a Valsalva maneuver and motor events ranging from day dreaming to the effects of suffocation and brain swelling As Jean Aicardi writes in his foreword to this volume Over 140 case histories bring the flavor of real life into an exhaustive yet highly readable account This monograph is undoubtedly the most comprehensive source of information available about the various types of anoxic attacks their clinical and EEG features mechanisms and prognosis This is a delightful book that anyone involved in clinical medicine in general and child neurology in particular will enjoy reading      **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70

**Precursors and Causes in Development and Psychopathology** Dale F. Hay, Adrian Angold, 1993-06-22 International researchers in various areas of developmental psychology and psychiatry consider the issues of precursors and causes used to describe and explain normal and abnormal development Highlights the emergent theoretical interest in biological influences on psychological development

**Epileptic Syndromes in Infancy, Childhood and Adolescence** Joseph Roger, 1992 This is a rewritten edition of a classic work known as The Blue Guide The first edition of the book appeared in 1985 and was based on a workshop held in Marseille in July 1983 That workshop which had brought together the Commission on classification and Terminology of the International League Against Epilepsy and an international group of epilepsy experts was an important event in the development of an international classification of epilepsies and epileptic

syndromes ICEES      *Disease and Healing in the New Testament* Keir J. Howard, 2001-05-23 Disease and Healing in the New Testament is a comprehensive and critical examination of New Testament data relating to disease and healing from scientific and medical perspectives as well as theological perspectives Particular attention is given to the recorded healings by Jesus in the Gospels and by the Apostles in Acts relating them to modern medical concepts particularly diagnostic categories This book argues that the healings undertaken by Jesus and the Apostles show the consistent and coherent pattern of conditions amenable to folk medicine      British Book News ,1987      *Forthcoming Books* Rose Arny, 1992      **Temporal Lobe Epilepsy, 1948-1986** Christopher Ounsted, Janet Lindsay, Peronelle Richards, 1987      **Temporal Lobe Epilepsy** Ounsted, 1988-01      **Biological Factors in Temporal Lobe Epilepsy Preface: Gilbert Glaser** Christopher Ounsted, Janet Lindsay, Ronald Norman, Gilbert Glaser, 1966
