**Rural Young Women, Education, and Socio-Spatial Mobility** Wendy Geller, 2015-10-08 Much of the literature on globalization has centered on the large macro level forces that influence the ways ideas people and various forms of capital move around the world From this vantage point discussions about the progressive feminization of migration in particular the feminization of out migration from rural areas indicate an intriguing trend Simultaneously the local experience of global forces is an important way of exploring how macro level processes are navigated by social actors on the ground This provides added texture to our understanding of why and how people make decisions about their lives within an increasingly interconnected social economic and political environment This volume explores whether concurrent patterns in identity development social relations and youth behaviors on the micro level might help explain similarities observable at the macro level Through a triangulated approach that balances between statistical backdrops extant quantitative research and in depth qualitative interviews this book theorizes about shifts in gender normativity efforts towards social mobility and the possible effects of an increasingly globalized society To do this it examines the decision making processes employed by high achieving young women from rural areas in Vermont and Leinster Ireland as they figured out who they wanted to become as adults and where they wanted to be those people Remaining mindful of structural constraints and using the lens of the psychic landscape Reay 2005 to view class as a reflexive practice this book peers into the ways certain types of identity evident among blue collar students seem to be carving out some potential for social and spatial mobility amidst both global and local trends

**The Top Ten Diseases of All Time** Stacey Smith?, 2023-10-24 Infectious diseases have been with us for millennia and continue to pose a threat from the irritation of flu season to the potential extinction of our species We instinctively fear them and alter our behaviour as a result The reason we bury bodies six feet deep is because that was the depth that stopped plague transmission from the dead in the Middle Ages Many religious practices such as avoiding certain meats were established

because of foodborne disease transmission In The Top Ten Diseases of All Time Stacey Smith presents the top ten deadliest diseases and their effects on society providing a wealth of information about the trajectory and terrible impact of each disease and humanity's reaction to these diseases throughout the millennia Did you know for example that The medical symbol evolved from the worms wrapped around a stick because that was the only way to remove Guinea worms from the body so having a stick meant you were a doctor Smallpox is the third worst disease ever yet it remains the only successfully eradicated human disease but not for long thanks in part to a successful vaccine in part to photographic recognition cards and in part due to helicopter led forced vaccinations of whole villages in the former Yugoslavia This brings up issues of individual rights versus public good that remain relevant today Four diseases were targeted for eradication in the 20th century the failure to do so led directly to the creation of the environmental movement The inability of priests to explain how to stop the plague in the Middle Ages broke the back of the church as an all powerful and all knowing institution and led to colonialism and slavery The Top Ten Diseases of All Time offers a fascinating overview of the deadliest diseases to spread throughout the world including HIV AIDS Spanish Flu Measles The Black Death Smallpox and others

**The Hope of Liberation in World Religions** Miguel A. De La Torre, 2008 Liberation theology emphasizes the Christian mission to bring justice to the poor and oppressed As a part of Christian theology liberation theology has been most frequently associated with the Catholic Church in Latin America This groundbreaking work seeks to identify how the theological concepts of liberation theology might be manifested within other world faith traditions This is thus the first book that attempts to find a common ground for liberation theology across religions All of the contributors are scholars who share the religion or belief system they describe Throughout they endeavor to articulate liberationist concepts from the perspective of those who have been marginalized

**Globalization and the Challenges of a New Century** Patrick O'Meara, Howard D.

Mehlinger,Matthew Krain,2000-06-22 On world politics      **Globalization and Health** Belinda Bennett,George F. Tomossy,2006-06-21 Within contemporary society globalization has emerged as a key concern at the centre of ethical legal and policy debates relating to health care Conflicts between public interests and individual rights the challenge of regulating health professionals and access to health services and the effects of a global market all feature prominently in these discussions As a result of globalization these issues can no longer be understood solely within the political boundaries that define traditional notions of individuals and communities Rather solutions demand a global conception of rights and obligations which in turn requires new approaches to health policy formulation and a reevaluation of existing ethical and legal frameworks In essence the impact of globalization on human health is testing the robustness of modern regulatory systems legal doctrines and ethical paradigms PUBLIC HEALTH DEVELOPING GLOBAL CONCERNS The interconnectedness of the global economy presents new challenges in public health While globalization has facilitated improvements in health care it has also created new hazards and avenues for the exploitation of vulnerable persons It is becoming increasingly apparent that both national and international responses are required Indeed as the chapters in this section convey public health is rightly a global concern Globalization has led to a sharing of both risks and responsibilities in public health Belinda Bennett reminds us of the ease with which infectious diseases can spread within the global community given the speed of modern travel and trade      The Rigged Game John Hively,2006 Demonstrates what popular opinion entertains that the rich get richer and the poor get poorer      Biological Globalisation Wouter van der Weijden,Rob Leewis,Pieter Bol,2017-02-13 Bioglobalisation is anything but new The exotic fungus Phytophthora has threatened European potato harvests since 1846 Since then the number of deliberate and accidental introductions of exotic species has grown rapidly Environmental factors such as climate change also play an increasing role This book is a thorough and informative overview of all aspects of bioglobalisation It describes its nature and scope as well as history drivers and mechanisms Using vivid examples the book addresses which species are likely to become invasive which bioregions are vulnerable and whether we can and should try to control bio invasions Separate chapters address the impacts of bioglobalisation on the environment and on our economy and discuss for instance how virus invasions are threatening human lives worldwide      **The Bible as Word of God** Dennis Gira,Diego Irarrázaval,Marie-Theres Wacker,2010 Concilium is a theological journal with an international reputation It offers the best of current theological thinking from a wide variety of international perspectives      Locating US Theological Education In a Global Context Hendrik R. Pieterse,2019-06-21 CONTRIBUTORS E Byron Anderson K K Yeo Margaret Eletta Guider OSF Lester Edwin J Ruiz Brent Waters Namsoon Kang Luis R Rivera and David Esterline Theological education in the United States finds itself in untested circumstances today Rapid social change is creating an increasing multicultural multiracial and multireligious context for leadership formation At the same time international enrollment cross border educational initiatives student and faculty exchanges and more are connecting US theological schools with a global

community of Christian teaching and learning How do US theological institutions locate themselves within this global ecology of theological formation so as to be both responsible participants and creative shapers within it That is how do they discern their proper place and role It is questions like these that the contributors to this volume explore Building on the decades long discussion about the globalization of US theological education this book argues that in engaging such questions US theological institutions have much to gain from a sustained conversation with the burgeoning literature on the internationalization of American higher education This research offers theological institutions a trove of insights and cautionary tales as they seek to discern their rightful place and role in educating leaders in and for a global Christian church
