Mapping Nature across the Americas Kathleen A. Brosnan, James R. Akerman, 2021-10-19 Maps are inherently unnatural Projecting three dimensional realities onto two dimensional surfaces they are abstractions that capture someone s idea of what matters within a particular place they require selections and omissions These very characteristics however give maps their importance for understanding how humans have interacted with the natural world and give historical maps especially the power to provide rich insights into the relationship between humans and nature over time That is just what is achieved in Mapping Nature across the Americas Illustrated throughout the

essays in this book argue for greater analysis of historical maps in the field of environmental history and for greater attention within the field of the history of cartography to the cultural constructions of nature contained within maps This volume thus provides the first in depth and interdisciplinary investigation of the relationship between maps and environmental knowledge in the Americas including for example stories of indigenous cartography in Mexico the allegorical presence of palm trees in maps of Argentina the systemic mapping of US forests and the scientific platting of Canada s remote lands

The Humanity of Cities John Gulick, 1989 I recommend this book highly to social scientists who are looking for a review or refresher course in urbanology advanced undergraduate students and introductory graduate students As our American college student bodies become more culturally diverse *The Humanity of Cities* provides a welcome respite from the usual culture bound texts that give limited attention for effect only of the stereotypical Third World Contemporary Sociology Gulick s style is to develop each topic by presenting appropriate case studies He manages to include an enormous range of studies and he wisely reaches out beyond anthropology to the many fields that concern themselves with urban life This book is consequently an excellent compilation of the recent history of theoretical and empirical research on an in cities The 28 page bibliography is itself a tour de force American Anthropologist Combining major urban theories with empirical studies from around the world the author offers poignant glimpses into urban life including the streets of San Francisco as seen through the eyes of a proud garbage collector the marketplace of Ibadan as seen by a petty food trader the curiously empty streets of Fun city a California retirement community and Cairo s teeming cemetery the City of the Dead filling with the living The problems of urban life are shown to be more a result of worldwide forces rather than the intrinsic nature of cities This major new and timely contribution to the field is a most useful way to introduce urban scholars planners and students in a variety of disciplines to *The Humanity of Cities* A complete teachers manual makes this the perfect text

Archaeology William L. Rathje, Michael B. Schiffer, 1982 **Flower World - Mundo Florido** Mark Howell, Matthias Stockli, Arnd Adje Both, 2014-12-31 The bilingual series *Flower World Music Archaeology of the Americas* raises the study of ancient music and music related activities of the pre Columbian Americas to the next level For the first time in the history of science a series offering anthologies featuring scientific investigations in this fascinating multidisciplinary field is available The series encompasses peer reviewed studies by renowned scholars on both past and living music traditions from South Central and North America and thus constitute a platform for the most up to date information on the music archaeology of the continent It features case studies and the results of research projects in the field in which a great variety of music archaeological approaches such as conventional archaeology for the interpretation of the find contexts experimental

Agriculture in Semi-Arid Environments A.E. Hall, G.H. Cannell, H.W. Lawton, 2012-12-06 The semi arid zones of the world are fragile ecosystems which are being substantially modified by the activities of mankind Increasing human populations have resulted in greater demands on semi arid zones for providing human sustenance and the possibility that this may enhance desertification is a grave concern These zones are harsh habitats for humans The famines that resulted from drought during the late 1960s and the 1970s in the African Sahel illustrated the unreliability of present agricultural systems in this zone Large fluctuations in agricultural production have occurred in semi arid zones of Australia North America and the Soviet Union due to periodic droughts even though considerable agricultural technology has been devoted to agricultural development in these zones The challenge to mankind is to manage these different semi arid zones so that productivity is increased and stabilized and environmental deterioration is decreased Irrigation can be used to increase and stabilize agricultural production in semi arid zones as discussed in Volume 5 of this series Arid Zone Irrigation The present volume Agriculture in Semi Arid Environments focuses on dryland farming in semi arid zones and is relevant to the large areas of the world where rainfall is limiting and where water is not available for irrigation This volume is designed to assist agricultural development in these areas and consists of reviews and analyses of available information by scientists working in Africa Australia and at the University of California
