## **Terminal Visions The Literature Of Last Things:**

*Terminal Visions* W. Warren Wagar, 1982      *Afterlife and Narrative in Contemporary Fiction* Alice Bennett, 2012-07-06

*Afterlife and Narrative* explores why life after death is such a potent cultural concept today and why it is such an attractive prospect for modern fiction. The book mines a rich vein of imagined afterlives from the temporal experiments of Martin Amis's *Time's Arrow* to narration from heaven in Alice Sebold's *The Lovely Bones*.      **American Cities in Post-Apocalyptic Science Fiction** Robert Yeates, 2021-11-15

*Visions of the American city in post apocalyptic ruin permeate literary and popular fiction across print visual audio and digital media. American Cities in Post Apocalyptic Science Fiction* explores the prevalence of these representations in American culture drawing from a wide range of primary and critical works from the early twentieth century to today. Beginning with science fiction in literary magazines before taking in radio dramas film video games and expansive transmedia franchises Robert Yeates argues that post apocalyptic representations of the American city are uniquely suited for explorations of contemporary urban issues. Examining how the post apocalyptic American city has been repeatedly adapted and repurposed to new and developing media over the last century this book reveals that the content and form of such texts work together to create vivid and immersive fictional spaces in ways that would otherwise not be possible. Chapters present media specific analyses of these texts situating them within their historical contexts and the broader history of representations of urban ruins in American fiction. Original in its scope and cross media approach *American Cities in Post Apocalyptic Science Fiction* both illuminates little studied texts and provides provocative new readings of familiar works such as *Blade Runner* and *The Walking Dead* placing them within the larger historical context of imaginings of the American city in ruins.

*Terror and Everyday Life* Jonathan Lake Crane, 1994-09-19

He persuasively demonstrates that horror films are not merely a manifestation of the solitary unconscious I or cultural abjection. This well crafted insightful and devilishly witty study brings horror out from under the psychoanalytic rock to let it scurry and bleed in the daylight of everyday life. The detailed endnotes are scintillating gems in and of themselves. *Choice* *Terror and Everyday Life* is an important well conceived and well executed work. Crane's treatment of the topic is unusual he clearly positions himself as a fan of the contemporary horror film. Consequently there are moments that seem to revel in the disgusting details of murder and mayhem. However this approach is appropriate as Crane makes perfectly clear this is what the genre is about so to ignore it would be to misrepresent its effects and for horror fans its pleasures. This is a complex scholarly work exceptionally original. Charles R Acland Communication Department The University of Calgary Alberta Canada. How does horror in film relate to the horror we experience in everyday life? This is one of the key questions addressed in this new examination of the horror film genre. *Terror and Everyday Life* argues that today's horror films have broken away from the genre's tradition to embrace far more violent imagery images that are in keeping with the escalating violence in our society. By examining the horror film its history and its current trends Jonathan Lake Crane furthers our understanding of the genre's

meaning in today's culture and our fascination with violence An important supplement for courses in popular culture media studies and film *Terror and Everyday Life's* unique approach on the nature of horror in our society will also be of interest in a wide range of disciplines

**Imagining Apocalypse** NA NA, 2016-04-30 This volume brings together essays by specialists in different disciplines on the cultural expression of apocalypse in particular in anglophone science fiction of the nineteenth and twentieth centuries Approaching these works from historical philosophical linguistic and literary perspectives the contributors examine the relationship between secular and spiritual apocalypse connecting the fiction and films to their historical moment Not surprisingly war recurs throughout this material as a critical turning point fulfilment of prophecy or prelude to a new age In particular the essays explore the issue of whether modern apocalypse is seen as an ending or a beginning considered under its political ethnic and gendered aspects Among the writers covered are H G Wells Olaf Stapledon and such contemporary figures as Michael Moorcock J G Ballard and Storm Constantine

*The Dead City* Paul Dobraszczyk, 2017-06-30 The Dead City unearths meanings from such depictions of ruination and decay looking at representations of both thriving cities and ones which are struggling abandoned or simply in transition It reveals that ruination presents a complex opportunity to envision new futures for a city whether that is by rewriting its past or throwing off old assumptions and proposing radical change Seen in a certain light for example urban ruin and decay are a challenge to capitalist narratives of unbounded progress They can equally imply that power structures thought to be deeply ingrained are temporary contingent and even fragile Examining ruins in Chernobyl Detroit

London Manchester and Varosha this book demonstrates that how we discuss and depict urban decline is intimately connected to the histories economic forces power structures and communities of a given city as well as to conflicting visions for its future

**Existential Threats** Lisa Vox, 2017-07-03 In *Existential Threats* Lisa Vox explores the growth of dispensationalist premillennialism alongside scientific understandings of the end of the world and contends that these two allegedly competing visions have converged to create an American apocalyptic imagination

In a Dark Time Joseph Dewey, 1990 What was gunpowder Trivial What was electricity Meaningless This atomic bomb is the Second Coming in wrath Winston Churchill July 1945 Commencing earnestly in the 1960s the American novel began its exploration into how mankind could adjust to life in the shadow of the mushroom cloud how we could begin to think about the Unthinkable American writers faced squarely the age birthed by nuclear physics and found in its very darkness difficult avenues to hope by rediscovering that most potent traditional response to a history in crisis the apocalyptic temper Dewey focuses on seven novels that touch the variety of generic experiments and postures of the post World War II American novel These novels by Vonnegut Coover Percy Pynchon Gaddis and DeLillo represent a significant argument concerning the American literary response to living within the oppressive technologies of the Nuclear Age Departing from other studies that veer toward speculative fiction or toward the more narrowly defined religious angles *In a Dark Time* defines the apocalyptic temper as a most traditional literary genre that articulates the anxieties of a community in crisis a way for that community to respond to the perception of a history gone critical by turning squarely to that history and to find in that gesture the way toward a genuine hope Dewey's new approach consists of applying the theory of apocalyptic literature to a body of essentially secular writings Dewey resists the traditional approach studying works dealing with nuclear devastation to focus on how a generation of literary responses have dealt with the larger questions about how to live with the recognition of End times Dewey convincingly demonstrates that this literature reminds its moments in history that only in a dark time will the eye begin to see

Un-American Dreams J. Jesse Ramírez, 2022-04-15 After the end the world will be un American This speculation forms the nucleus of *Un American Dreams* a study of US apocalyptic science fiction and the cultural politics of disimagined community in the short century of American superpower 1945 2001 Between the atomic attacks on Hiroshima and Nagasaki which helped to transform the United States into a superpower and initiated the Cold War and the terrorist attacks on the World Trade Center and the Pentagon which spelled the Cold War's second death and inaugurated the War on Terror apocalyptic science fiction returned again and again to the scene of America's negation During the American Century to imagine yourself as American and as a participant in a shared national culture meant disimagining the most powerful nation on the planet *Un American Dreams* illuminates how George R Stewart Philip K Dick George A Romero Octavia Butler and Roland Emmerich represented the impossibility of reforming American society and used figures of the end of the world as speculative pretexts to imagine the utopian possibilities of an un American world The American Century was simultaneously a closure of the path

to utopia and an escape route into apocalyptic science fiction the underground into which figures of an alternative future could be smuggled

**A Short History of the Future** W. Warren Wagar, 1989-09-20 In the tradition of H G Wells's *The Shape of Things to Come* W Warren Wagar's *A Short History of the Future* is a memoir of postmodern times Cast in the form of a history book the narrative voice of the book's powerful vision is that of a far future historian Peter Jensen who leaves this account of the world from the 1990s to the opening of the twenty third century as a gift to his granddaughter A dazzling and imaginative combination of fiction and scholarship Wagar's speculative history of the future alternates between descriptions of world events and intimate glimpses of his fictive historian's family through the ages Jensen's tale traces the flow of the future from the early twenty first century reign of a megacorporate global economy to its sudden collapse in 2044 when nuclear catastrophe envelops the world In the traumatic aftermath a socialist world commonwealth comes into being in the year 2062 followed by a lengthy transition to a decentralized order of technologically mature autonomous societies many located in outer space The riveting literary interludes that follow each chapter take the form of letters and documents from the history of Jensen's family evoking the everyday lives of people in the midst of these global historical events Here we meet a woman in Brazil whose son is dying from a new immuno deficiency disease two brothers comparing life on earth with life in a space colony and many more Neither fiction nor nonfiction Wagar's brilliantly creative work is not meant to forecast the future but rather to draw attention to possibilities and alternatives for humankind and planet Earth In doing so it also serves as an unforgettable reminder that the future is being made now

*J.G. Ballard's Politics* Florian Cord, 2017-01-23 This book is the first sustained investigation of the political dimension in the work of J G Ballard A product of and reaction to the cultural socio economic moment commonly designated as the postmodern condition Ballard's oeuvre is read as a continuous and developing meditation on the postmodern examining it specifically as an expression of late capitalism The book shows that at the heart of this meditation lies the question of resistance Drawing on a wide range of concepts and ideas taken from the field of critical theory it argues that in the face of a world marked by an unprecedented expansion of capital in which modernity's grand narratives have been invalidated and in which received forms of political struggle have lost their effectiveness Ballard's fiction commits itself to a deliberately irrational and extreme pataphysical thought in order to develop a new discourse of resistance Against past readings that have construed Ballard's writing as non political decadent or quietist the study thus reveals Ballard as a thoroughly political author committed to a subversive politics In this way the book also constitutes a timely intervention in the ongoing discussion concerning the nature and state of the political

**Dark Skies** Daniel Deudney, 2020-03-02 *Dark Skies* provides the first comprehensive and balanced assessment of the space enterprise past present and future It demolishes widely held optimistic assumptions about the desirability of many major space activities actual and prospective Most consequentially the hiding in plain sight use of outer space as a corridor for long range bombardment has increased the probability of catastrophic nuclear war Contrary to the widespread claim that

sustainable colonies on other celestial bodies are necessary for human survival from large scale disasters on Earth Dark Skies shows that colonization itself poses many severe threats and should be avoided Instead an Earth oriented space program should be pursued

**I Am Legend as American Myth** Amy J. Ransom, 2018-07-05 Richard Matheson's 1954 novel *I Am Legend* has spawned a series of iconic horror and science fiction films including *The Last Man on Earth* 1964 *The Omega Man* 1971 and *I Am Legend* 2007 The compelling narrative of the last man on earth struggling to survive a pandemic that has transformed the rest of humanity into monsters has become an American myth While the core story remains intact filmmakers have transformed the details over time reflecting changing attitudes about race and masculinity This reexamination of Matheson's novel situates the tale of one man's conflicted attitude about killing racialized others within its original post World War II context engaging the question of post traumatic stress disorder The author analyzes the several film adaptations with a focus on the casting and interpretations of protagonist Robert Neville

**Evangelical Millennialism in the Trans-Atlantic World, 1500-2000** C. Gribben, 2015-12-04 This book offers the first complete overview of the intellectual history of one of the most significant contemporary cultural trends the apocalyptic expectations of European and American evangelicals in an account that guides readers into the origins its evolution and its revolutionary potential in the modern world

Macey, 2013-04-11 In this encyclopedia some 200 international scholars in 360 articles explore subjects such as physics archeoastronomy astronomy mathematics time's measurements and divisions as well as covering other scientific and interdisciplinary areas biology economics and political science horology history medicine geography geology and telecommunications

*The Rise of Nuclear Fear* Spencer R. Weart, 2012-04-02 After a tsunami destroyed the cooling system at Japan's Fukushima Nuclear Power Plant triggering a meltdown protesters around the world challenged the use of nuclear power Germany announced it would close its plants by 2022 Although the ills of fossil fuels are better understood than ever the threat of climate change has never aroused the same visceral dread or swift action Spencer Weart dissects this paradox demonstrating that a powerful web of images surrounding nuclear energy holds us captive allowing fear rather than facts to drive our thinking and public policy Building on his classic *Nuclear Fear* Weart follows nuclear imagery from its origins in the symbolism of medieval alchemy to its appearance in film and fiction Long before nuclear fission was discovered fantasies of the destroyed planet the transforming ray and the white city of the future took root in the popular imagination At the turn of the twentieth century when limited facts about radioactivity became known they produced a blurred picture upon which scientists and the public projected their hopes and fears These fears were magnified during the Cold War when mushroom clouds no longer needed to be imagined they appeared on the evening news Weart examines nuclear anxiety in sources as diverse as Alain Resnais's film *Hiroshima Mon Amour* Cormac McCarthy's novel *The Road* and the television show *The Simpsons* Recognizing how much we remain in thrall to these setpieces of the imagination Weart hopes will help us resist manipulation from both sides of the nuclear debate

**The Naked**

**Communist: Cold War Modernism and the Politics of Popular Culture** Roland Vegso, 2013 Based on an analysis of American anti Communist politics in the 1950s the book presents parallel readings of modernism and popular fiction by concentrating on four recurrent figures the world the enemy the secret the catastrophe in order to show that the two cultural fields participated in a common ideological program

**Resurrection Songs** Michael Bradshaw, 2018-10-24 This title was first published in 2001 Thomas Lovell Beddoes 1803-49 was a powerful poet of the English Romantic period who has been and is still strangely neglected by critics His macabre blank verse dramatic writings and his delicately balanced lyrics have both won ardent admirers such as Browning Gosse Pound and Christopher Ricks Yet there are formal and generic problems in Beddoes's writings which continue to marginalize him as merely an eccentric and the canon of Romanticism seems to have found no place for him
