Terminus Brain Christopher Williams, 2001-06 Terminus Brain Christopher Williams, 1997 Williams education U of Birmingham UK proposes that the extreme complexity of the threats to human intelligence posed by a polluted environment calls for the use of a collective term environmentally mediated intellectual decline or EMID He investigates the impact of EMID in terms of medical and social sciences ecology evolutionary theory ethics and legality He questions the current faith in risk assessment considers the possibility of regressive brain evolution and suggests changes in education and human behavior that might help to remedy the situation Distributed by Books International Paper edition 33856 7 24 95 Annotation copyrighted by Book News Inc Portland OR Human Frontiers, Environments and Disease Anthony J. McMichael, 2001-06-28 A compelling account of the relentless trajectory of humankind across time and geography The Ingenuity Gap Thomas Homer-Dixon, 2010-01-29 As crises multiply ingenuity lags This prescient classic explains why societies falter when problems outpace solutions and offers a roadmap to close the gap before risks from climate shocks pandemics inequality and AI spiral beyond control First published at the turn of the millennium The Ingenuity Gap by Thomas Homer Dixon anticipated the turbulent world we now inhabit pandemics climate disasters political polarization disruptive runaway technologies and escalating global instability With remarkable foresight Homer Dixon warned that the complexity of our problems would accelerate faster than our collective ingenuity to solve them and that failure to close this gap would leave societies fragile and exposed A quarter century later his vision has proven prophetic Homer Dixon takes readers on a global tour of ingenuity under pressure from the desperate improvisation of pilots fighting to land United Airlines Flight 232 in Iowa to the water hungry expansion of Las Vegas to a harrowing search for a missing child in Patna and the collapse of Canada's cod fisheries Vivid and far reaching it is a sweeping portrait of what happens when societies are stretched beyond their capacity to adapt and an enlightening case for why ingenuity is humanity's most vital resource Celebrating over twenty five years in print The Ingenuity Gap remains both a visionary diagnosis of our age and a call to reimagine how we generate creativity resilience and leadership in uncertain times **Leadership Accountability in a Globalizing World** C. Williams, 2006-05-02 Leadership accountability for violence corruption and environmental harm is a new aspect of globalization and civil society This innovative forward looking analysis explains how cumulative lock in fuels leadership deceit The lessons are for those learning to be or learning to question leaders **Emerging Risks in the 21st Century An Agenda for Action** OECD, 2003-04-24 This book explores the implications of newly developing risks such as hugely damaging hurricanes new diseases terrorist attacks and disruptions to critical infrastructures Human Extinction Émile P. questions that inform this discussion including when humans began to worry about their own extinction and how the debate has changed over time It establishes a new theoretical foundation for thinking about the ethics of our extinction arguing that extinction would be very bad under most circumstances although the outcome might be on balance good Throughout the book graphs tables and images further illustrate how human choices and attitudes about extinction have evolved in Western history In its thorough examination of humanity's past this book also provides a starting point for understanding our future Although accessible enough to be read by undergraduates Human Extinction contains new and thought provoking research that will benefit even established academic philosophers and historians
