Sky Mystery Magic And Myth:

The Sky Jean-Pierre Verdet, 1992 Dictionary of Nature Myths Tamra Andrews, 2000 Comprehensive and cross referenced this informative volume is a rich introduction to the world of nature as experienced by ancient peoples around the globe 51 halftones The Amateur Astronomer's Introduction to the Celestial Sphere William Millar, William Charles Millar, 2006-06-08 Introduction to the night sky and the principles of naked eye astronomy using only elementary mathematics A Skywatcher's Year Jeff Kanipe, 1999-07-08 Have you ever wondered what that bright point of light twinkling near the horizon is or just when you can expect to see the best shooting stars of the year A Skywatcher's Year has answers to these and other questions about what is visible in the night sky throughout the year Through 52 articles arranged week by week A Skywatcher's Year guides you to celestial events and phenomena that occur or are visible with the naked eye and binoculars for each week of the year It acquaints you not only with up to date astronomical information on stars nebulae meteors the Milky Way and galaxies but also conveys the beauty and wonder of the night sky Covering both the Northern Hemisphere and Southern Hemisphere A Skywatcher's Year helps readers find prominent stars and constellations bright star clusters nebulae and galaxies and explains how and when to observe prominent annual meteor showers *Women Who Fly* Serinity Young, 2018-01-02 From the beautiful apsaras of Hindu myth to the swan maidens of European fairy tales stories of flying women some carried by wings others by clouds rainbows floating scarves and flying horses reveal the perennial fascination with and ambivalence about female power and sexuality In *Women Who Fly* Serinity Young examines the motif of the flying woman as it appears in a wide variety of cultures and historical periods in legends myths rituals sacred narratives and artistic productions She considers supernatural women like the Valkyries of Norse legend who transport men to immortality winged deities like the Greek goddesses Iris and Nike figures of terror like the Furies witches and succubi airborne Christian mystics and wayward dangerous women like Lilith and Morgan le Fay Looking beyond the supernatural Young examines the modern mythology surrounding twentieth century female aviators like Amelia Earhart and Hanna Reitsch Throughout Young demonstrates that female power has always been inextricably linked with female sexuality and that the desire to control it is a pervasive theme in these stories This is vividly depicted for example in the twelfth century *Nibelungenlied* in which the proud warrior queen Brunnhilde loses her great physical strength when she is tricked into surrendering her virginity Even in the twentieth century the same idea is reflected in the exploits of the comic book and film character Wonder Woman who Young suggests retains her physical strength only because her love for fellow aviator Steve Trevor goes unrequited The first book to systematically chronicle the figure of the flying woman in myth literature art and pop culture *Women Who Fly* offers a fresh look at the ways in which women have both influenced and been understood by society and religious traditions throughout the ages and around the world **Astronomy Across Cultures** Helaine Selin, 2012-12-06 *Astronomy Across Cultures* A History of Non Western Astronomy consists of essays dealing with the

astronomical knowledge and beliefs of cultures outside the United States and Europe In addition to articles surveying Islamic Chinese Native American Aboriginal Australian Polynesian Egyptian and Tibetan astronomy among others the book includes essays on Sky Tales and Why We Tell Them and Astronomy and Prehistory and Astronomy and Astrology The essays address the connections between science and culture and relate astronomical practices to the cultures which produced them Each essay is well illustrated and contains an extensive bibliography Because the geographic range is global the book fills a gap in both the history of science and in cultural studies It should find a place on the bookshelves of advanced undergraduate students graduate students and scholars as well as in libraries serving those groups

The Moon and the Western Imagination Scott L. Montgomery, 2022-03-29 The Moon is at once a face with a thousand expressions and the archetypal planet Throughout history it has been gazed upon by people of every culture in every walk of life From early perceptions of the Moon as an abode of divine forces humanity has in turn accepted the mathematized Moon of the Greeks the naturalistic lunar portrait of Jan van Eyck and the telescopic view of Galileo Scott Montgomery has produced a richly detailed analysis of how the Moon has been visualized in Western culture through the ages revealing the faces it has presented to philosophers writers artists and scientists for nearly three millennia To do this he has drawn on a wide array of sources that illustrate mankind's changing concept of the nature and significance of heavenly bodies from classical antiquity to the dawn of modern science Montgomery especially focuses on the seventeenth century when the Moon was first mapped and its features named From literary explorations such as Francis Godwin's *Man in the Moone* and Cyrano de Bergerac's *L'autre monde* to Michael Van Langren's textual lunar map and Giambattista Riccioli's *Almagestum novum* he shows how Renaissance man was moved by the lunar orb how he battled to claim its surface and how he in turn elevated the Moon to a new level in human awareness The effect on human imagination has been cumulative our idea of the Moon and therefore the planets is multilayered and complex having been enriched by associations played out in increasingly complicated harmonies over time We have shifted the way we think about the lunar face from a perfect body to an earthlike one with corresponding changes in verbal and visual expression Ultimately Montgomery suggests our concept of the Moon has never wandered too far from the world we know best the Earth itself And when we finally establish lunar bases and take up some form of residence on the Moon's surface we will not be conquering a New World fresh and mostly unknown but a much older one ripe with history

Elemental Philosophy David Macauley, 2010-09-29 Bachelard called them the hormones of the imagination Hegel observed that through the four elements we have the elevation of sensuous ideas into thought Earth air fire and water are explored as both philosophical ideas and environmental issues associated with their classical and perennial conceptions David Macauley embarks upon a wide ranging discussion of their initial appearance in ancient Greek thought as mythic forces or scientific principles to their recent reemergence within contemporary continental philosophy as a means for understanding landscape and language poetry and place the body and the body politic In so doing he shows the importance

of elemental thinking for comprehending and responding to ecological problems In tracing changing views of the four elements through the history of ideas Macauley generates a new vocabulary for and a fresh vision of the environment while engaging the elemental world directly with reflections on their various manifestations **Sun Moon Earth** Tyler Nordgren,2016-09-13 With beautiful illustrations and a detailed map Sun Moon Earth has everything you need to get ready for the next solar eclipse On April 8 2024 millions of Americans will experience an awe inspiring phenomenon a total eclipse of the sun In Sun Moon Earth astronomer Tyler Nordgren illustrates how this most seemingly unnatural of natural phenomena was transformed from a fearsome omen to a tourist attraction From the astrologers of ancient China and Babylon to the high priests of the Maya Sun Moon Earth takes us around the world to show how different cultures interpreted these dramatic events Greek philosophers discovered eclipses cause and used them to measure their world and the cosmos beyond Victorian era scientists mounted eclipse expeditions during the age of globe spanning empires And modern day physicists continue to use eclipses to confirm Einstein s theory of relativity Beautifully illustrated and lyrically written Sun Moon Earth is the ideal guide for all eclipse watchers and star gazers alike Environment, Space, Place - Volume 2, Issue 1 (Spring 2010) Gary Backhaus,2010-01-01 Archetypes and Motifs in Folklore and Literature: A Handbook Jane Garry,Hasan El-Shamy,2017-07-05 This is an authoritative presentation and discussion of the most basic thematic elements universally found in folklore and literature The reference provides a detailed analysis of the most common archetypes or motifs found in the folklore of selected communities around the world Each entry is written by a noted authority in the field and includes accompanying reference citations Entries are keyed to the Motif Index of Folk Literature by Stith Thompson and grouped according to that Index s scheme The reference also includes an introductory essay on the concepts of archetypes and motifs and the scholarship associated with them This is the only book in English on motifs and themes that is completely folklore oriented deals with motif numbers and is tied to the Thompson Motif Index It includes in depth examination of such motifs as Bewitching Chance and Fate Choice of Roads Death or Departure of the Gods the Double Ghosts and Other Revenants the Hero Cycle Journey to the Otherworld Magic Invulnerability Soothsayer Transformation Tricksters **The Same Ax, Twice** Howard Mansfield,2001-06 A wide ranging inquiry into the nature and possibility of restoration Discoveries: Prehistoric Art and Civilization Denis Vialou,1998-10 Discusses prehistoric civilization as represented by art and artifacts of the period including weapons and tools architecture cave paintings engravings and statues **Discoveries: India and the Mughal Dynasty** Valerie Berinstain,1998-03-01 In the 16th century the Mughal emperors of India were among the greatest and most magnificent rulers of the East Their arts of painting and architecture were peerless their wealth fabulous their courts renowned for culture and refinement their jewels incomparable This book follows the rise of Mughal dynasty in the 16th century its heyday in the 17th and its decline in the 19th Fabled India here we meet the legendary emperors Babur and Akbar the Great we enter splendid courts and discover their political schemes and ambitions ytheir marvelous artists their
