defining quality This will imply the search for a consensus between allegedly diverging approaches i e between their different basic concepts aims and standards Given the social and economic context within which these developments are taking place the focus of the contributions is on their critical assessment in different European countries An overview is given about national developments in the areas of care for older persons and other social services The contributors from Austria Belgium Denmark Finland Germany Italy the Netherlands Norway Sweden and the UK look at how and by whom quality is defined and what challenges the actors of the traditionally mixed economy of personal social services are meeting Empirical evidence about user involvement and satisfaction is given but also theoretical reasoning about the impact of business approaches on a public good Thus the book tries to fill an important gap in practice research and policy making concerning personal social services and quality issues
