Sst Here It Comes Ready Or Not:

NASA EP. United States. National Aeronautics and Space Administration, 1968 Flying Magazine , 1969-09 The Crash of Piedmont Airlines Flight 22 Paul D. Houle, 2016-01-05 Against a backdrop of inadequate funding misplaced priorities and a lack of manpower American commercial aviation in the 1960s was in a perilous state In July 1967 when a Piedmont Airlines Boeing 727 collided with a Cessna 310 over Hendersonville North Carolina killing 82 people the industry was in crisis Congress called hearings on aviation safety and government and union officials pressured President Lyndon Johnson to request increased funding for aviation safety But the National Transportation Safety Board s probe into the crash was flawed from the start The investigative team was made up of individuals whose companies had certain interests in the outcome The lead investigator was the brother of the vice president of Piedmont Airlines In an effort to shift blame from the government and Piedmont critical conversations recorded on tape never made it into the NTSB s report Maintenance and training records as well as industry warnings of the 727 s operational limitations were also omitted This book reveals the true story of the investigation what was left out and why **High-Speed Dreams** Erik M. Conway, 2008-11-03 In High Speed Dreams Erik M Conway constructs an insightful history that focuses primarily on the political and commercial factors responsible for the rise and fall of American supersonic transport research programs Conway charts commercial supersonic research efforts through the changing relationships between international and domestic politicians military NASA contractors private investors and environmentalists He documents post World War II efforts at the National Advisory Committee on Aeronautics and the Defense Department to generate supersonic flight technologies the attempts to commercialize these technologies by Britain and the United States during the 1950s and 1960s environmental campaigns against SST technology in the 1970s and subsequent attempts to revitalize supersonic technology at the end of the century High Speed Dreams is a sophisticated study of politics economics nationalism and the global pursuit of progress Historians along with participants in current aerospace research programs will gain valuable perspective on the interaction of politics and technology **Flying Magazine** , 1969-09 EPA-600/5 , 1974-02 *Behind the Curve* Joshua P. Howe, 2014-04-01 In 1958 Charles David Keeling began measuring the concentration of carbon dioxide in the earth s atmosphere at the Mauna Loa Observatory in Hawaii His project kicked off a half century of research that has expanded our knowledge of climate change Despite more than fifty years of research however our global society has yet to find real solutions to the problem of global warming Why In Behind the Curve Joshua Howe attempts to answer this question He explores the history of global warming from its roots as a scientific curiosity to its place at the center of international environmental politics The book follows the story of rising CO2 illustrated by the now famous Keeling Curve through a number of historical contexts highlighting the relationships among scientists environmentalists and politicians as those relationships changed over time The nature of the problem itself Howe explains has privileged scientists as the primary spokespeople for the global climate But while the science first forms of

advocacy they developed to fight global warming produced more and better science the primacy of science in global warming politics has failed to produce meaningful results In fact an often exclusive focus on science has left advocates for change vulnerable to political opposition and has limited much of the discussion to debates about the science itself As a result while we know much more about global warming than we did fifty years ago CO2 continues to rise In 1958 Keeling first measured CO2 at around 315 parts per million by 2013 global CO2 had soared to 400 ppm The problem is not getting better it s getting worse Behind the Curve offers a critical and levelheaded look at how we got here **Environmental Education;**
