Understanding the British Empire Ronald Hyam, 2010-05-20

Understanding the British Empire draws on a lifetime's research and reflection on the history of the British Empire by one of the senior figures in the field Essays cover six key themes the geopolitical and economic dynamics of empire religion and ethics imperial bureaucracy the contribution of political leaders the significance of sexuality and the shaping of imperial historiography A major new introductory chapter draws together the wider framework of Dr Hyam's studies and several new chapters focus on lesser known figures Other chapters are revised versions of earlier papers reflecting some of the debates and controversies raised by the author's work including the issue of sexual exploitation the European intrusion into Africa including the African response to missionaries trusteeship and Winston Churchill's imperial attitudes Combining traditional archival research with newer forms of cultural exploration this is an unusually wide ranging approach to key aspects of empire

Africa and the Modern World Immanuel Maurice Wallerstein, 1986

Beyond the Gatekeeper State Sara Rich Dorman, 2020-11-25 Beyond the Gatekeeper State explores the dynamic changes occurring within and between African states and the international system since the turn of the century Frederick Cooper's model of gatekeeper states shaped as much by their international links as by their domestic practices provides the basis for the contributors thinking about international relations in Africa and the wider international system The chapters explore the political implications of Africa's

new relations with the old super powers former colonial powers and the emerging powers from the South These new relationships reflect and affect changing technology infrastructure and resource flows within and between African states Drawing on both rich empirical cases and theoretical approaches the book interrogates the implications of these changes on how we think about states and state systems Exploring the impact of changing technology finance and resources on African politics Beyond the Gatekeeper State will be of great interest to scholars of African Politics and International Relations IR as well as African Studies IR and the politics of the Global South more broadly This book was originally published as a special issue of Third World Thematics

The High Road and the Low Dan Vittorio Segre,1974 **Conflict in Africa** Adda Bruemmer Bozeman,2015-03-08 Do modern Western ideas about the nature of conflict and its resolution apply to Africa To answer this question Adda Bozeman examines conflict in Africa south of the Sahara in its many social political and cultural aspects past and present The author shows how African perspectives on war and diplomacy have evolved under the influence of nonliteracy tribalism and a concept of undifferentiated time In addition she confirms that indigenous cultural traditions are resurgent everywhere making it unlikely that African political values will become more closely aligned with those of the West The two civilizations view conflict differently and have different ways of resolving it The Africans are more at ease with conflict than their Western counterparts and they do not see war and peace as the mutually exclusive phenomena that Occidental societies hold them to be The author concludes that modern Western concepts of conflict not only do not but cannot allow for African realities Originally published in 1976 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Bibliography of Nigeria Nduntuei O. Ita,2019-05-23 First published in 1971 this major bibliography devoted to Africa s most populous country Nigeria is therefore a timely contribution which must be welcomed by all The Bibliography of Nigeria contains over 5 400 entries in archaeology all branches of anthropology linguistic and relevant historical and sociological studies Many of the entries carry indicative or informative annotations which have greatly enhanced the usefulness of the work The history and culture of Africa constitutes a rich area of study and research which is attracting an ever increasing number of scholars the world over The new impetus which African studies is receiving in the major centre of learning today has added urgency to the long neglected problem of bibliographical control of the vast literature The dearth of bibliographies in the field of African studies has been a main source of frustration to all those working in this area The book is divided into two parts part one deals with Nigeria as a whole and lists general works or those concerned with several regions or several ethnic groups Part two is devoted to the various ethnic groups An analytical table of contents a comprehensive ethnic index an author index and

an index of Islamic studies together with generous cross referencing ensure ready and easy location of individual entries

Migrant Labour in South Africa's Mining Economy Alan H. Jeeves, 1985-06-01 In tracing the development of the recruiting system Alan Jeeves shows how a large proportion of the labour supply came to be controlled by private labour companies and recruiting agents who aimed both to exploit the workers and to extract heavy fees from the employing companies The gold industry struggled for years against the internal divisions which created the competition for labour until at last the Chamber of Mines with the support of the state succeeded in driving out the private recruiters and centralizing the system under its control This study of the interests involved in the struggle for control of the black labour supply reveals much about the forces which created and now entrench racial domination in South Africa's industrial economy **Culture**

and Political Change Myron Joel Aronoff, The burgeoning field of political anthropology has as its essential purpose examining the relationship between the exercise of power and the uniqueness of cultural forms Culture and Political Change emphasizes interdisciplinary semiotic and phenomenological approaches to the relationship between political change and the durability of such cultural forms as drama symbol myth ritual and religion Leading anthropologists and political scientists present case studies illuminating the complex causes and nature of political change **Political Thought and the Public**

Sphere in Tanzania Emma Hunter, 2015-04-27 Political Thought and the Public Sphere in Tanzania is a study of the interplay of vernacular and global languages of politics in the era of decolonization in Africa Decolonization is often understood as a moment when Western forms of political order were imposed on non Western societies but this book draws attention instead to debates over universal questions about the nature of politics concept of freedom and the meaning of citizenship These debates generated political narratives that were formed in dialogue with both global discourses and local political arguments The United Nations Trust Territory of Tanganyika now mainland Tanzania serves as a compelling example of these processes Starting in 1945 and culminating with the Arusha Declaration of 1967 Emma Hunter explores political argument in Tanzania's public sphere to show how political narratives succeeded when they managed to combine promises of freedom with new forms of belonging at local and national level *The Forgotten Front* Ross

Anderson, 2014-08-04 The First World War began in East Africa in August 1914 and did not end until 13 November 1918 In its scale and impact it was the largest conflict yet to take place on African soil Four empires and their subject peoples were engaged in a conflict that ranged from modern Kenya in the north to Mozambique in the south The campaign combined heroic human endeavour and terrible suffering set in some of the most difficult terrain in the world The troops had to cope with extremes that ranged from arid deserts to tropical jungles and formidable mountains and almost always on inadequate rations Yet the East African campaign has languished in undeserved obscurity over the years with many people only vaguely aware of its course of events Indeed Humphrey Bogart's famous film *The African Queen* inspired by an episode of the campaign often provides its only lasting image *The Forgotten Front* is the first full scale history of this neglected campaign

Ross Anderson details the fighting and the strategic and political background to the war and the differing viewpoints of the principal protagonists **The Military Effectiveness of Post-Colonial States** Pradeep Barua, 2013-04-15 Current military historiography has a tendency to portray the military effectiveness of non western post colonial states in broad generalized stereotypes This monograph examines the militaries of Nigeria Argentina Egypt and India in times of crisis to challenge these assumptions The book shows that despite having broad similarities each of these states had unique characteristics that impacted their military effectiveness in different ways These key variables included the military institutions maturity and skill sets the availability and management of human and material resources and the quality of both civil and military leadership
