Annotated bibliography covering two centuries of scholarly criticism on the extensive corpus of medieval saints legends with the assistance of Margaret Rogerson Saints legends are being increasingly recognised as one of the most important genres of the middle ages and attract much critical attention This volume surveys the scholarly literature of the nineteenth and twentieth centuries on the extensive Middle English corpus It also provides a conspectus of the genre's history in the Middle English period and its place in the development of the modern discipline of Middle English while both the introduction and the annotations give attention to the problematic boundaries between genres and to the issues involved in separating out texts from their manuscript contexts General studies of the corpus as a whole are covered as well as discussions and editions of individual legends of the various extended cycles of legends and of sermon collections that include hagiographic legends and exempla the volume has been structured so as to provide an overview of the research on major works for example the South English Legendary and St Erkenwald and authors such as Osbern Bokenham John Capgrave William Caxton and John Mirk It includes an Index of Scholars and Critics keyed to the Bibliography an Index of Middle English Texts that covers all works of whatever genre mentioned in the annotations and an Index of Manuscripts that gathers the references to the over 170 manuscripts cited      **An Anatomy of Trade in Medieval Writing** Lianna Farber, 2006 Economics in our modern sense of the term was not a discipline in the Middle Ages although the history of economic thought is often written as though it were Lianna Farber restores the core economic concept of trade to its

medieval contexts showing that it contains three component parts value consent and community Medieval writing about trade not only relies on these elements it presents them as unproblematic By addressing texts in which each element of trade is discussed directly Farber demonstrates that this straightforward picture is falsely reassuring In fact these ideas were deeply contested In the end Farber reveals writing about trade was not descriptive but argumentative analyzing the act in an attempt to justify it Such texts reveal deep intellectual uncertainties about the market society they advocated An Anatomy of Trade in Medieval Writing benefits from Farber s close reading of literary sources among them the poetry of Geoffrey Chaucer and Robert Henryson theological sources including the writing of Thomas Aquinas and Richard of Middleton and legal sources such as the canon law on marriage formation A provocative contribution to our understanding of medieval life and thought this book implies a need to reconsider the genealogy of economics as a way of thinking about the world
