Stage Lighting C. H. Ridge, F. S. Aldred, 1945 *Stage Lighting* C. Harold Ridge, F. S. Aldred, 1945 **Encyclopedia of Stage Lighting** Jody Briggs, 2015-06-14 This encyclopedia contains more than 1500 detailed entries covering such topics as equipment methods concepts design process electricity characteristics of light and lightboard operations Where applicable entries present both the historical and current significance of the apparatus or concept being described Entries are extensively cross referenced and many include line drawings and samples of lighting paperwork *Stage Lighting* Richard E. Dunham, 2015-10-30 The book's organization follows a layered approach that builds on basic principles Light as a Medium Part 1 Tools of a Lighting Designer Part 2 Design Fundamentals Part 3 and Lighting Applications Part 4 This presents students with a practical and logical sequence when learning basic concepts The full spectrum of the lighting design process is presented in detail giving students an example of how one might develop a lighting design from script analysis through concept and plot development and all the way to an opening This detailed process with a step by step design approach gives students a plan to work from which they can later modify as they mature and gain confidence as designers The text contains a more comprehensive discussion of basic technology light as a physical phenomena and methodology of designs than is found in most introductory texts bridging the gap between introductory and advanced lighting courses The text will appeal to theatrical designers who want to venture into areas of lighting like architectural or virtual lighting design while at the same time gaining a solid grounding in the fundamentals of lighting design Lighting Design will also benefit illuminating engineers who want to move away from mere computational approaches in lighting and on to explore techniques along the design approaches of theatrical lighting design The final 9 chapters cover many specialty areas of lighting design highlighting the unique and shared qualities that exist between the different aspects of these elements Discussions involve traditional entertainment areas like theatre as well as lesser known facets of the industry including film video landscape lighting retail museum lighting virtual lighting concert spectacle performances and architectural lighting Models of design tasks demonstrate the actual use and development of plots sections schedules photometrics tables and cut sheets rather than simply talking about what they are This hands on approach provides students with a firm understanding of how to actually use these tools and processes *Stage Lighting* Cecil Harold Ridge, 1935 *Stage Lighting Second Edition* Richard E. Dunham, 2018-10-16 *Stage Lighting The Fundamentals* is written specifically for introductory stage lighting courses The book begins with an examination of the nature of light perception and color then leads into a conversation of stage lighting equipment and technicians Lamps luminaries controls dimming and electricity form the basis of these chapters The book also provides a detailed explanation and overview of the lighting design process for the theatre and several other traditional forms of entertainment Finally the book explores a variety of additional areas where lighting designers can find related future employment such as concert and corporate lighting themed design architectural and landscape lighting and computer
