Guderian's Panzers Craig W.H. Luther, 2025-09-09 From unstoppable blitzkrieg to brutal defeat follow Guderian's panzers as they race toward Moscow and collide with disaster On June 22 1941 Nazi Germany launched Operation Barbarossa the surprise invasion of the Soviet Union that opened the Eastern Front in World War II With lightning speed and devastating success the German army tore through Soviet territory and rolled over the Red Army scoring some of the most dramatic victories in military history until the blitzkrieg bogged down during the approach on Moscow At the spearhead of the attack was General Heinz Guderian one of the most celebrated and controversial commanders of the war who commanded a tank group in the center of the German front that stretched from the Baltic to the Black Sea Guderian's Panzers reconstructs Barbarossa from the perspective of Generaloberst Guderian and his 2nd Panzer Group With the German war machine at the height of its martial prowess in June 1941 Guderian's group of 250 000 men and 900 tanks rapidly broke through the Soviet frontier defenses and thrust some 600 kilometers into Soviet Russia in a matter of weeks in doing so playing an integral part in the successful encirclement cauldron battles of Belostok Minsk June July 1941 and Smolensk July August 1941 each of these battles resulting in the loss of several Soviet armies and hundreds of thousands of prisoners Despite having sustained alarming losses of personal and equipment in these opening battles Guderian pushed his men and himself to even greater achievements culminating in the triumphant cauldron Battle of Kiev in the Ukraine September 1941 that obliterated Soviet Southwestern Front and resulted in the capture of over 600 000 Red Army POWs It was perhaps Germany's greatest victory in WWII and Guderian had made it happen In October November 1941 the German Ostheer Eastern Army launched a desperate attempt to seize Moscow and once again Heinz Guderian and his tank troops were at the forward edge of battle Yet by the end of November the entire German offensive exhausted stretched thin dangerously reduced in strength and suddenly largely paralyzed by the fall rain and snow had ground to a halt Meanwhile in early December the resurgent Red Army launched a major counteroffensive that in the weeks ahead not only threatened Guderian's forces with annihilation but those German Army Group Center writ large Guderian and the Ostheer as a whole were now trapped in a remorseless war of attrition they could never win Refusing his superiors orders to stand fast in the face to the advancing Soviet juggernaut Guderian continued to jerk back in retreat with the remnants of his forces and thus was relieved of his command on 26 December 1941 Military historian and Eastern Front expert Craig Luther draws on new material from letters to diaries to tell the story of Guderian's armored force during Operation Barbarossa and fleshes out the story with vivid firsthand accounts from the soldiers who slugged it out with the Red Army on the Eastern Front The book traces the ups and downs of Guderian

and his panzer group during six pivotal months of World War II and explains why and how the Germans especially its panzers achieved such impressive successes only to be defeated on Moscow's doorstep **Rocket Artillery** Sabine

Zetterling, Anders Frankson, 2020-01-10 Compelling prose abundant tactical detail lots of maps If you're hungering for a good WWII East Front battle book look no further Russ Lockwood Magweb.com In January 1944 around the village of Korsun near the larger town of Cherkassy on the Dneiper a disaster happened Six divisions of Germany's Army Group South became surrounded after sudden attacks by the 1st and 2nd Ukrainian Fronts The Germans' greatest fear was the prospect of another Stalingrad the catastrophe that had occurred precisely one year before Due to both weather and ferocious resistance the German drive to rescue their trapped divisions stalled It soon became apparent that only one option remained for the beleaguered defenders breakout Without consulting Hitler on the night of February 16 Erich von Manstein ordered the breakout to begin Led by the strongest formation within the pocket SS Wiking the trapped forces surged out and soon rejoined the surrounding panzer divisions who had been fully engaged in weakening the ring Stalin was left with little but an empty bag as Army Group South this time had pulled off a rescue In The Korsun Pocket Niklas Zetterling a researcher at the Swedish Defense College since 1995 and Anders Frankson have provided a highly detailed and often breathtaking account of one of the most dramatic battles of World War II From grand strategy to soldiers' voices on the ground including expert statistical analysis the action and the stakes of the battle at Korsun are made vividly clear Thoroughly researched and well written Globe at War Military history at its very best very readable and fascinating War Books Out Now **Soviet Cavalry**

Operations During the Second World War John S. Harrel, 2019-09-30 The author of The Nisibis War analyzes the Red Army's usage of horse-mounted units along the Soviet German Eastern Front during World War II While the development of tanks had largely led to the replacement of cavalry in most armies by 1939 the Soviets retained a strong mounted arm In the terrain and conditions of the Eastern Front they were able to play an important role denied them elsewhere John Harrel shows how the Soviets developed a doctrine of deep penetration using cavalry formations to strike into the Axis rear disrupting logistics and lines of communication encircling and isolating units Interestingly he also shows that this doctrine did not stem from the native cavalry tradition of the steppe but from the example of the American Civil War The American approach was copied by the Russians in WWI and the Russian Civil War refined by the Soviets in the early stages of World War Two and perfected during the last two years of the war The Soviet experience demonstrated that deep operations cavalry raids against enemy rear echelons set the conditions for victory Although the last horse-mounted units disappeared in the 1950s their influence led directly to the formation of the Operational Manoeuvre Groups that ironically faced U.S. forces in the Cold War An expansive analysis of the technical tactical and operational employment of Soviet cavalry against the Germans and their Axis allies For practitioners who want to understand the history and development the book is a goldmine of overlooked campaigns and actions The book's dense and detailed presentation makes it valuable to operational planners and those interested in the Soviet German war ARMOR Magazine
